## PURPOSE AND OBJECTIVES

The SAP Sailing Program works with the Sailing Team Germany ([sailing-team-germany.de](http://sailing-team-germany.de)) to build software that helps the German national sailing team to sail better and to promote the sailing sport by more exciting media coverage for sailing events. Key objective is to develop solutions to support sailors' decision making and help link their strategy to execution. This involves e.g. smart capturing, analysis and display of comprehensive wind, venue and tracking data.

## EXPECTATIONS AND TASKS

We are looking for working students (f/m) in part-time or interns (f/m) in fulltime to support us with the following activities:

- Design and implementation of web user interfaces, both in plain HTML5/JavaScript/CSS as well as with GWT
- Implementation of smart analysis algorithms for tracking data
- Creation of mobile applications for tracking, trim data entry and race spectator support

Our project offers unique possibilities to work in close collaboration with the German sailing top athletes. Site visits in Kiel or other sailing venues for end-user interviews are regularly part of our activities. The lessons learned in this project will be transferred into SAP's technology strategy.

This is a great opportunity to gain implementation experience in a real-world project with immediate customer exposure. Learn about useful standard technologies such as Java, OSGi, GWT in an open and free (as in "free speech") working environment with experienced mentors.

## EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

- Student (f/m) at a university or university of applied sciences
- Preferred fields of study: Computer Science, Business Information Science or other IT-related fields
- Very good skills in one or more of the following programming languages: Java, HTML, JavaScript, CSS
- Fluency in English and German language - verbal and written
- Passionate team player who is not afraid of deadlines
- Basic knowledge about sailing sport would be an asset

Your set of application documents should contain a cover letter, a resume in table form, school leaving certificates, current university transcript of records, copies of any academic degrees already earned, and if available, references from former employers (including internships).. Please describe as well your experience and skills in foreign languages and computer programs/ programming languages.

**! PLEASE APPLY ONLINE ON [WWW.CAREERSATSAP.COM](http://WWW.CAREERSATSAP.COM) !**

SAP is the global market leader for business software and thus contributes a considerable part of the world's economic power grid. At SAP you get your chance to put your ideas into action with maximum impact.
