

## TIBCO Associate Consultant

Headquartered in Palo Alto, California, TIBCO Software Inc. (NASDAQ:TIBX) provides enterprise software that helps companies achieve service-oriented architecture (SOA) and business process management (BPM) success. TIBCO provides companies the two-second advantage™ – the ability to capture the right information, at the right time, and act on it preemptively for a competitive advantage. More than 4,000 customers worldwide rely on TIBCO to manage information, decisions, processes, people, and data in real time.

This is a unique opportunity to join TIBCO consulting organisation, as we are currently looking for IT graduates, experienced developers and junior IT consultants, who would like to become TIBCO consultants.

Associate Consultants will participate in a wide range of consulting project activities. These will include technical challenges such as hardware/software specification and design, solution design, implementation, integration, deployment, testing and performance tuning, system architecture definition and client training. There will also be opportunities to get involved with other activities such as project management and interaction with company and client managers or participation in sales and proposal presentations.

This is a permanent role based in Munich. However, travel is a major component of this role (75-100%) with travel to client sites nationwide. You will also have the opportunity for some international travel.

### Qualifications:

- Bachelors, Masters, or PhD in subjects such as: computer science, information systems, software engineering, IT or related subjects
- Strong software analysis, development, and design skills
- Passion for technology and willingness to learn
- Knowledge of UNIX and Windows operating systems
- Ability to demonstrate technical aptitude in two or more of the following: JAVA, J2EE (JMS, EJB, JSP), SQL, XML, HTML, XPATH or web services
- Familiarity with .NET
- Some understanding of enterprise architecture integration, business process management, and service-oriented architecture
- Some understanding of network design, operation, and performance tuning
- Desire to work with customers and travel
- Work experience in business and IT during university, internships, and other employment
- Implementation experience
- Developer role experience
- Consulting exp. BPM/SOA/Messaging (optional)

It is essential that candidates are eligible to work permanently in UK & Europe without any restrictions (Normally an EEC passport holder).
