

## Call for Posters

# „META-LING 2023 - Methodological Exploration and Technological Advances in Linguistics“

**10.11.2023 at the University of Bamberg**

Carolin Cholotta & Christine Renker, Otto-Friedrich-University Bamberg  
BAGL - Bamberg Graduate School of Linguistics.

The conference is dedicated to methodological issues and technological advances in linguistics. The focus is on current topics and innovative methods, which will be presented by young researchers.

Empirical research methods play a central role in linguistic research and young researchers have numerous possibilities to gain new insights. Modern software tools, experimental technologies, and mixed-methods approaches broaden the choice. In order to find a suitable method for one's own research question, an interdisciplinary exchange about new and innovative technologies is helpful. Furthermore, questions about the validity and accessibility of survey instruments and the robustness of analysis procedures need to be addressed.

This Young Researchers' Conference is specifically aimed at students, PhD students and other young scientists and provides them with a platform to present and discuss novel approaches and to foster collaboration and knowledge exchange among young scientists. META-LING aims to foster interdisciplinary discussions and to present contributions from linguistics as well as related fields such as computational linguistics, human-computer interaction, cognitive science, and language technology.

We invite you to submit an abstract for a **poster** on the following or related topics:

- Methodological issues and difficulties
- Experimental software tools for linguistic research
- New mixed-methods approaches in linguistic analysis
- Tools for data preparation and transformation
- Accessibility and visualization of data sets

**Keywords:** Theories and methods from the fields of: Cognitive Linguistics, Psycholinguistics, Applied Linguistics, Diachronic/Synchronic Corpus Linguistics, Computational Linguistics, Statistics

Conference languages are both English and German.

**Submission guidelines:**

- Abstracts should be written in English or German and have a maximum length of 200 words (excl. bibliography).
- Please include your name, institution, and email address in your submission.
- Abstracts should be sent by email to [meta-ling23.bagl@uni-bamberg.de](mailto:meta-ling23.bagl@uni-bamberg.de).
- Bring your poster printed in A0 format to the conference.

Please use "META-LING 23 abstract submission" as the subject of the email.

Important dates:

- Deadline for abstract submission: 10/20/23
- Notification of acceptance: 10/25/23

We are looking forward to your submissions. Further information and Updates you will find online: <https://www.uni-bamberg.de/bagl/meta-ling-tagung-2023/>. For questions, please contact [meta-ling23.bagl@uni-bamberg.de](mailto:meta-ling23.bagl@uni-bamberg.de).

Yours sincerely,

Carolin Cholotta & Christine Renker - PhD student spokespersons BAGL
