

REFLEXIVE PRONOUNS IN TANTI

REFLEXIVE PRONOUNS: INVENTORY

- Simple reflexive

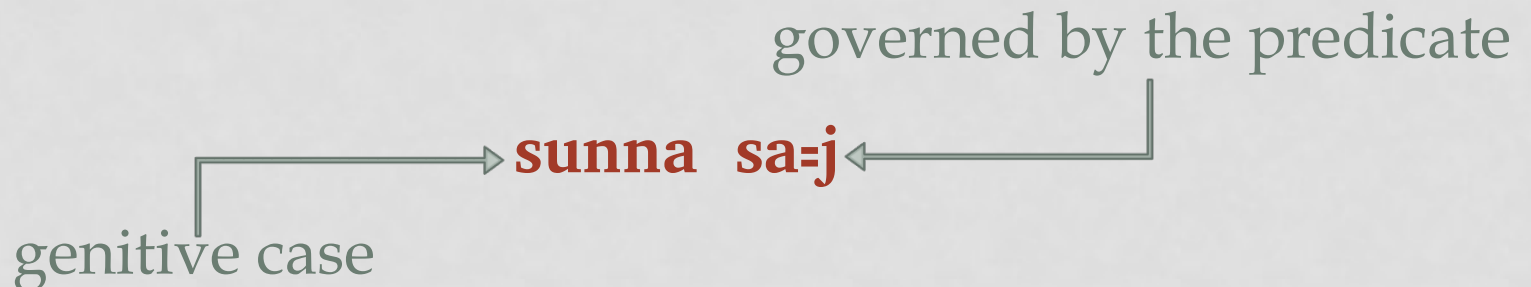

Case	Sg	Pl
ABS	sa=j	sa < b > i
ERG	sun-ni	ču-li
GEN	sun-na	ču-la
DAT	sun-ni-ž	ču-ž
COMIT	sun-ni-c:ele	ču-c:ele
SUPER	sun-ni-ja	ču-ja

REFLEXIVE PRONOUNS: INVENTORY

- Complex reflexive

- Complex intensifier

BASIC FUNCTIONS

- Complex reflexive pronoun:
 - local reflexive only

musa **sun-ni-ž** **sa=j** ra^hhimc'al-li-c:e=w

Musa self-OBL-DAT self=M mirror-li-c:e=w

če-w=až-ib

ON-M=see:PF-PRET

‘Musa saw himself in the mirror.’

BASIC FUNCTIONS

- Complex intensifier:
 - intensifier only

musa sun-na sa=j ag-ur šahar-li-c:e
Musa self-GEN self=M go:PR-PRET town-OBL-INTER
'Musa went to the town himself (alone).'

BASIC FUNCTIONS

- Simple reflexive pronoun:
 - reflexive/ anaphoric pronoun
 - logophoric pronoun
 - intensifier
 - resumptive pronoun (in relative clauses)

BASIC FUNCTIONS

- Reflexive/anaphoric pronoun
 - Local reflexive:

hi.t **sun-na** quli ag-ur
that_i self-GEN house:LOC go:PF-PRET
'He_i went to his_{i,j} home.'

BASIC FUNCTIONS

- Anaphoric pronoun:

[[**hi.1** ʕa^f-q'-ri-li-ja šak-iχ-ub-le,]

this NEG-go:IPF-MSD-OBL-SUPER < guess > LS-(M)LV:PF-PRET-CONV

[**sa=j** w=irʕe^f-w=iq-ri b=aχ-ur-le,]

self=M < deceive > M=LS-M=LV:PF-MSD N=know:PF-PRET-CONV

malla nasrat:in-ni q'adi-c:e

Mullah Nasreddin-ERG qadi-INTER(LAT)

x:ar-b=aχ-i-le = sa=j] [...]

< ask > LS-N=LV:PF-PRET-CONV = COP=M

‘He guessed that that man would not come, he understood that he had been deceived and asked the qadi [...]

BASIC FUNCTIONS

- Logophoric pronoun

[**sun-ni** dam wa^f-se ʃa^f-b=irq'-i-d] w=ič'-u **hi.t**
self-ERG I:DAT bad-ATR NEG-N=do:IPF-TH-1 M=say:IPF-TH that
'He_i said that he_i would not do any harm to me.'

BASIC FUNCTIONS

- Intensifier

hi.t-i-li **sun-ni** b=arq'-ib hi.t
that-OBL-ERG self-ERG N=do:PF-PRET that
'He did that himself (without any hints).'

- Resumptive pronoun

sun-na hela=b durh-ne b=umʔ-u^f-se **anq**
self-GEN behind=HPL boy-PL HPL=play-PRS-ATR garden
'the garden (such that) the children were playing behind it.'

REFLEXIVE PRONOUNS WITHIN THE CLAUSE

COMPLEX REFLEXIVE

- Complex reflexive pronouns are strictly local.
- Core arguments control non-core arguments.
- In the transitive and affective constructions, the core arguments are symmetrical with respect to the reflexive control: they control each other.

CORE ARGUMENTS OF A TRANSITIVE CLAUSE: SYMMETRY

- a. **ruslan-ni** arslan-ni-ž **sun-ni** **sa=j**
Ruslan-ERG Arslan-OBL-DAT self-ERG self=M
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-IN=M ON-M=see:PF-CAUS-PRET
- b. **ruslan** arslan-ni-ž **sun-ni** **sa=j**
Ruslan Arslan-OBL-DAT self-ERG self=M
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-IN=M ON-M=see:PF-CAUS-PRET

(a = b) 'Ruslan showed himself to Arslan on the photo.'

NO CONTROL FROM THE NON-CORE ARGUMENTS

c. *ruslan-ni **arслан-ni-ž** **sun-ni-ž** **sa=j**
Ruslan-ERG Arslan-OBL-DAT self-OBL-DAT self=M
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-IN=M ON-M=see:PF-CAUS-PRET

(intended translation:) ‘Ruslan_i showed Arslan_j to himself_j on the photo.’

AFFECTIVE CONSTRUCTION

- a. **musa-ž** **sun-ni-ž** **sa=j** w=ič:-aq-u
Musa-DAT self-OBL-DAT self=M M=want-CAUS-PRS
- b. **musa** **sun-ni-ž** **sa=j** w=ič:-aq-u
Musa self-OBL-DAT self=M M=want-CAUS-PRS
(a = b) 'Musa (only) loves himself.'

INTRANSITIVE PREDICATION:

a. **musa-li** χabar = ak: ar-le
Musa-ERG story = NEG-CONV
da^fqi b=arq'-ib
wound N=do:PF-PRET

‘Musa accidentally wounded himself.’

b. ***musa-ž** χabar = ak: ar-le
Musa-DAT story = NEG-CONV
da^fqi b=arq'-ib
wound N=do:PF-PRET

(intended translation:) ‘Musa accidentally wounded himself.’

sun-ni **sun-ni-ž**
self-ERG self-OBL-DAT

sun-ni **sun-ni-ž**
self-ERG self-OBL-DAT

INTRANSITIVE PREDICATION

a. **murad** **sun-ni-c:e** **sa=j**

Murad self-OBL-INTER self=M

“ʕu^f maladec = de” w=ik'-u-le = sa=j

you good.boy = 2SG M=say:IPF-PRS-CONV = COP=M

‘Murad says to himself: «You are great!»’

b. ***murad-li-c:e** **sun-ni-c:e** **sa=j**

Murad-OBL-INTER self-OBL-INTER self=M

“ʕu^f maladec = de” w=ik'-u-le = sa=j

you good.boy = 2SG M=say:IPF-PRS-CONV = COP=M

(intended translation: the same)

COMPLEX REFLEXIVES: SYNTACTIC RESTRICTIONS

- Core arguments (A, P, S) control non-core arguments and each other
- Non-core arguments do not control core arguments

SIMPLE REFLEXIVES IN A TRANSITIVE CLAUSE

- No obvious restrictions: even the core arguments can be controlled by other NPs and by each other.

a. **ruslan-ni_i** arslan-ni-ž_j **sa-j_i**
Ruslan-ERG Arslan-OBL-DAT self=M
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-INTER=M ON-M=see:PF-CAUS-PRET

b. **ruslan_i** arslan-ni-ž_j **sun-ni_i**
Ruslan Arslan-OBL-DAT self:OBL-ERG
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-INTER=M ON-M=see:PF-CAUS-PRET

‘Ruslan showed himself to Arslan on the photo.’

SIMPLE REFLEXIVES IN A TRANSITIVE CLAUSE

- No obvious restrictions: even the core arguments can be controlled by other NPs and by each other.

a. **ruslan-ni_i** arslan-ni-ž_j **sa=j_{i,j}**
Ruslan-ERG Arslan-OBL-DAT self=M
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-INTER=M ON-M=see:PF-CAUS-PRET

‘Ruslan showed himself to Arslan/Arslan to himself on the photo.’

b. **ruslan_i** arslan-ni-ž_j **sun-ni_i**
Ruslan Arslan-OBL-DAT self:OBL-ERG
surrat-li-c:e=w če-w=až-aq-ib
picture-OBL-INTER=M ON-M=see:PF-CAUS-PRET

‘Ruslan showed himself to Arslan on the photo.’

SIMPLE REFLEXIVES IN AN INTRANSITIVE CLAUSE

- In an intransitive predication, the absolutive argument can be controlling any other argument, but it cannot be cross-referenced by another NP within the same predication:

a. **pat'imat** umra-c:ele **sun-ni-ja-r-ha**
 Patimat neighbour-COMIT self-OBL-SUPER-EL-UP
 iχtilat-r=ik'-u-le = sa=r
 < speak > LS-F=LV:IPF-PRS-CONV = COP=F

(possible meaning:) 'Patimat is speaking with the neighbour about herself.'

b. (*) **pat'imat-li-ja-r-ha** umra-c:ele **sa < r > i**
 Patimat-OBL-SUPER-EL-UP neighbour-COMIT self < F >
 iχtilat-rik'ule = sa=r
 < speak > LS-F=LV:IPF-PRS-CONV = COP=F

(impossible meaning:) 'Patimat is speaking with the neighbour about herself.'

SIMPLE REFLEXIVES IN AN INTRANSITIVE CLAUSE

- a. **murad_i** **sun-ni-ja_i** ra^fhimc'al-li-c:e
Murad self-OBL-SUPER mirror-OBL-INTER
ʕe^fr-urk'-u-le = sa=j

<look> LS-(M)LV:IPF-PRS-CONV-COP=M

‘Murad is watching himself in the mirror.’

- b. (*)**murad-li-ja_i** **sa=j_i** ra^fhimc'al-li-c:e
Murad-OBL-SUPER self=M mirror-OBL-INTER
ʕe^fr-urk'-u-le = sa=j

<look> LS-(M)LV:IPF-PRS-CONV-COP=M

(impossible translation: ‘Murad is watching himself in the mirror.’)

SYNTACTIC RESTRICTIONS

- The only attested restriction:
- The absolutive argument of an intransitive verb cannot be controlled by another NP of the same clause

SIMPLE REFLEXIVE PRONOUNS

FREQUENT TEXT FUNCTIONS

FUNCTIONING IN THE TEXTS

- Oral texts in Tanti published in [Sumbatova & Lander 2014]
- Total volume: app. 400 sentences
- 37 reflexives

FUNCTIONING IN THE TEXTS

Local reflexive	11
Distant reflexive	10
“Long distance” pronoun	12

LOCAL REFLEXIVE

- From a core argument to a genitive possessor: 7 cases

he.l.t:u-r-se.le b=ač'-ib-le, **hi.l halmaκ = ra**
here-EL-UP HPL=come:PF-PRET-CONV this bridegroom = ADD
sun-ni-la s:ak:a-se x:unul = ra [...] hi.l-t:i
self-OBL-GEN new-ATR wife = ADD this-PL
aždah-un-a-lla č:ak: a-se k'a^ɪlɿ-n-a^ɪ-ħa^ɪ-ke.le
dragon-PL-OBL.PL-GEN beautiful-ATR palace-PL-OBL.PL-IN-DOWN
ka-b-iž-ib-le = sa < b > i
DOWN-HPL=sit:PF-PRET-CONV = COP < HPL >
Having come there, the bridegroom and his new wife settled
down in the beautiful dragon's palace.'

LOCAL REFLEXIVE

- From a core argument to a genitive possessor: 7 cases

walah – w=ik'-u-l=da, dam ʕaʕ-b=alχ-a-d,
wallahi M=say:IPF-PRS-CONV = 1 I:DAT NEG-N=know:IPF-TH-1
[**ču-la** b=uħna=b **li < b > il** **buk'n-e**
self.PL-GEN HPL=inside=HPL all < HPL > shepherd-PL
q:uzɤaldi-ha-b=iχ-ub-le = de]
< worry > LS-N=LV:PF-PRET-CONV = PST
«Wallahi, – said I, – I don't know, all the shepherds have
been quarrelled».

LOCAL REFLEXIVE

- Right-dislocated coordinate NP

he.l-t:iaždah-un-a-c:e b=ik'-u-le = sa < b > i

this-PLdragon-PL-OBL.PL-INTER N=say:IPF-PRS-CONV = COP < N >

k:urt:a: «ħa^ɪna, – b=ik'-u-le = sa < b > i

fox now N=say:IPF-PRS-CONV = COP < N >

talqan le-w=q'-un-ne te=w,

padishah HITHER-M=go:IPF-PRS-CONV EXST=M

[**sun-ni-la** χ:ala-se ʕa^ɪskar = ra **sa=j** = ra]

self-OBL-GEN big-ATR army = ADD self=M = ADD

The fox says to the dragons: «Now, – it says, – the padishah is coming here with his great army».

LOCAL REFLEXIVE

- Right-dislocated coordinate NP

hi.χ.t:u=d kurt'-d=ik'-u-le

there=NPL(ESS) < swim > LS-NPL=LV:IPF-PRS-CONV

ba^t' [č:ib-ne = ra **sa=b = ra**]

duck duckling-PL = ADD self=N = ADD

‘There is a duck with the ducklings swimming there.’

DISTANT REFLEXIVE

- The controller is a preposed converbal clause, the reflexive pronoun is in a clause on the right of it: 8 cases

[hat'i č'u-jna-lla [meq sa-b=aḡ-ib-se = zamana,]
 then two-MULT-GEN wedding HITHER-N=reach:PF-PRET-ATR = time
 [ag-ur-le = sa < b > i **hi.l-t:i** č:ak: a-le
 go:PF-PRET-CONV = COP < HPL > this-PL beautiful-ADV
 urči-li-ja=b], [če-kaχ-ur-le **Ø_{ERG}** pa^ɪrta^ɪl],
 horse-OBL-SUPER=HPL(ESS) ON-DOWN + put.on:PF-PRET-CONV clothes
sa < b > i ag-ur-le = sa=b talqan-ni-š:u]
 self < HPL > go:PF-PRET-CONV = COP=HPL padishah-OBL-AD(LAT)
 'Then, when the time for the wedding came, they put on beautiful
 clothes and rode for the second time to the padishah.'

DISTANT REFLEXIVE

[[**hi.1** ʕa^ʕ-q'-ri-li-ja šak-iχ-ub-le,]

this NEG-go:IPF-MSD-OBL-SUPER < guess > LS-(M)LV:PF-PRET-CONV

[**sa=j** w=irʕe^ʕ-w=iq-ri b=aχ-ur-le,]

self=M < deceive > M=LS-M=LV:PF-MSD N=know:PF-PRET-CONV

malla nasrat:in-ni q'adi-c:e

Mullah Nasreddin-ERG qadi-INTER(LAT)

x:ar-b-aχ-i-le = sa=j] [...]

< ask > LS-N=LV:PF-PRET-CONV = COP=M

'He guessed that that man would not come, he understood that he had been deceived and asked the qadi [...]'

ANAPHORIC PRONOUN

- The antecedent is an important object of the discourse (focus of empathy?)
- In a previous sentence it is presented by a phonetically non-zero NP (normally, a core argument)
- In some further predications it can be presented by several coreferential zero NPs
- After that, there is a piece of text where this antecedent is totally absent
- When returning to this antecedent, the speaker encodes it by the simple reflexive

malla nasrat:in-ni šit'-ʃaʃq-ib-le

Mullah Nasreddin-ERG <sound> LS-NEG + LV:PF-PRET-CONV

∅ w=it'-ač'-ib-le

∅

b=aʃq-ib-le

<make.effort> M=LS-LV:PF-PRET-CONV

N=hit:PF-PRET-CONV

q'adi-la k_aʃnt'aʃ,

∅

w=ik'-u-le = sa=j:

qadi-GEN nape

M=say:IPF-PRS-ADV = COP=M

hi.t-i-li q:-ib-se

ʃaʃp:aʃsi dam

that-OBL-ERG carry:PF-PRET-ATR abbas I:dat

ʃaʃč:-ib-le,

ʃaʃt

b=at-e,

–

NEG + give:PF-PRET-CONV

you:DAT

N=leave:PF-IMP

∅ w=ik'-u-le = sa=j

M=say:IPF-PRS-CONV = COP=M

sa=j quli

ag-ur-s:a=j

self=M house:LOC(LAT) go:PF-PRET-ATR + COP=M

Silently, Mullah Nasreddin forcefully hit the qadi on his nape and said: “Don’t give me the abbas that he will bring, leave it to yourself.” And (then) he went home.

χ̣:alaba r=ibṣ̌:-ib = q:alle,
grandmother F=run.away:PF-PRET = when

χ̣:ala.t:at:i = ra urk'-uq-un-ne:

grandfather = ADD <shiver> LS-(M)LV:PF-PRET-CONV

wa^h, se-li r=ibṣ̌:-ib-le = wara hi.t?

wah what-ERG F=run.away:PF-PRET-CONV = RQ that

se-k'al b=it'a^hrg-ur-le b=iχ̣_-an-da-le,

what-INDEF N=THITHER + NEG + go:PF-PRET-CONV N=become:PF-TH-PST-COND

hi.t ʃa^h-r=ibṣ̌:-ini = q'ale ible

that NEG-F=run.away:IPF-HAB = ACTL CIT

∅ b=arx-b=at-ur-le žuž = ra, **sa=j** = ra

<leave> N=LS-N=LV:PF-PRET-CONV book = ADD self=M = ADD

hi.l-i-hi-t:i **sa=j** = ra w=ibṣ̌:-ib-le = sa=j

that-OBL-POST-TRANS self=M = ADD M=run.away:PF-PRET-CONV = COP=M

When the grandmother ran away, the grandfather shivered too: “Wah, why did she run away? If nothing had happened, she would not run away.” He left his book and ran away after her.

ANAPHORIC PRONOUN

- The pronoun is very close to its antecedent, but it is a non-core argument (dative):

ba ^ɬ z-le-ħe=w	buk'un	χe=w.
enclosure-OBL-IN=M(ESS)	shepherd	EXST=M
[sun-ni-ž duče	w=a ^ɬ q'-iž	zamana
self-OBL-DAT herd(LAT)	M=go:IPF-INF	time
ʕa ^ɬ -d=ič-ib-se =j]		
NEG-NPL=fall:PF-PRET-ATR = PQ		
[duče ʕa ^ɬ -d=ik-u-se =j]		ʕa ^ɬ -b=alχ-a-d...
herd(LAT) NEG-NPL=fall:IPF-TH-ATR = PQ		NEG-N=know:IPF-TH-1

‘There is a shepherd in the enclosure. I don’t know– probably it is not time for him to go herding, or they do not go to the pasture...’

MOST FREQUENT FUNCTIONS OF THE SIMPLE REFLEXIVE

- Local reflexive: coreference of a core argument and a possessive genitive
- Distant reflexive: coreference of two core arguments in a chain: in a preposed converbial clause and in a clause following it
- Anaphoric pronoun: coreference of a NP to the focus of empathy that was temporarily absent in the discourse
