|--|--|
| Sales and Marketing Management   |  |
| (since WS23/24)  |  |
| Module responsible: Prof. Dr. Björn Ivens  |  |
| Further responsible persons: Research assistants   |  |
| Content:   |  |
| The course "Sales and Marketing Management" discusses h<br>tions with customers and the institutions involved those inter-<br>management processes required in order to understand both<br>course then introduces the strategic and operative decisions<br>companies' sales and marketing processes. | actions. It analyses the complex n demand and competition. The |
| Topics:  |  |
| 1. Sales and marketing as managerial challenges  |  |
| In the first unit, students learn about customer needs and wis<br>tion and value chains. Furthermore, it deals with value chain<br>ing management and different types of markets.  |  |
| 2. Objectives in sales and marketing   |  |
| Firstly, the marketing concept is introduced. In a further step<br>differentiated concerning effectiveness and efficiency in mark<br>tives, and concerning cause-effect relationships.   |  |
| 3. Market and customer orientation I   |  |
| This chapter introduces the guiding principles of market and selected process models and constructs of customer behavior   |  |
| 4. Market and customer orientation II  |  |
| The second part of the discussion of market and customer o orientation and cross-functional coordination.  | rientation focusses on competitor                              |
| 5. Marketing intelligence I  |  |
| An introduction to market research is provided. Furthermore, methods of data analysis are presented.   | , methods of data collection and                               |
| 6. Marketing intelligence II   |  |
| The second part of marketing intelligence deals with marketi planning.   | ng planning, forecasting and budge                             |
| 7. Marketing activities  |  |
| In this unit, students discover the activity and actor side of sa<br>functional relationships between dependent and independen   | <b>o</b> ,   |
| 8. Product management  |  |
| After an overview of the product mix, product management is service, brand management and program management.  | s introduced and linked to customer                            |

#### 9. Price management

This chapter establishes the fundamental importance of pricing as a strategic process. It encompasses a definition of price that includes customer payments and seller value creation. It then introduces the notion of price-value concepts and discusses several important instruments used in price management.

#### 10. Distribution management

This unit deals with the selection of distribution channels, organisation of the distribution structure and the organisation of sales activities within distribution systems.

11. Promotion Management

Promotion Management includes all communication instruments and communication strategies. Various operative and strategic instruments are explained.

12. Sales and marketing implementation

The final chapter explains the challenges of translating sales and marketing plans into actual activities and presents the main fields of implementation, such as digital support systems for sales and marketing or HR challenges.

#### Learning objectives / competences:

The aim of the course is to:

- explain the significance of sales and marketing both for a company's value creation and value claiming processes,

- understand which strategic decisions and which operative tasks sales and marketing management encompasses,

- present the relationship between sales and marketing,

- demonstrate the fundamental importance of market research, IT systems, HR systems, and systematic control processes for the implementation of sales and marketing management concepts and, thus, for the performance of a company.

|---|---------------------------------|
| Introduction to Marketing Intelligence  |                                 |
| (since SS24)  |                                 |
| Module responsible: Prof. Dr. Björn Ivens   |                                 |
| Further responsible persons: Research assistants  |                                 |
| Content:  |                                 |
| The course "Introduction to Marketing Intelligence" deals with ma<br>and information basis for marketing and sales decisions.   | arketing intelligence as a data |
| Topics:   |                                 |
| 1. Fundamentals of marketing intelligence   |                                 |
| Students are provided with a definition of marketing intelligence. In subsequent steps, the pur-<br>pose, industry and process of marketing research are presented and ethics in marketing are dis-<br>cussed.              |                                 |
| 2. Determining the research problem   |                                 |
| This chapter is divided in three parts: Identification of management's information needs, specifi-<br>cation of research questions and confirmation of the value of information.  |                                 |
| 3. Selecting the research design  |                                 |
| When selecting the research design, classification of the design, selection of the data collection method, design of the measurement instrument and determination of the sampling plan and procedure need to be considered. |                                 |
| 4. Execution of the research design   |                                 |
| The execution of the research design is presented in two steps: Collecting data and monitoring fieldwork.   |                                 |
| 5. Data preparation and analysis  |                                 |
| First, a definition of data preparation is presented. Various descriptive and inductive data analy-<br>sis techniques are then discussed and applied.   |                                 |
| 6. Report preparation and presentation  |                                 |
| This unit puts a focus on the objectives and the format of the ma   | rketing research report.        |
| 7. International marketing research   |                                 |
| Especially dealing with international marketing research, this unit introduces measurement, scaling and data collection issues.   |                                 |
| Learning objectives / competences:  |                                 |
| The aim of this course is to understand:  |                                 |
| - the relevance of market research as a basis for deriving strated  | jies in companies,              |
| - the fundamental aspects of data collection, analysis and interpr  | retation,                       |
| - as well as the communication of research results.   |                                 |

| Further information:                         |                       |                                   |
