Guidelines for the Approval of Credit Points from Foreign Universities

Studying at a foreign university can be a very enriching experience academically as well as personally. That is why we work together with the international office, to assist you in overcoming organizational obstacles and finding the right university for you.

Due to differences in the universities` programs, it can be difficult to assess whether credits can be transferred or not.

If you want to transfer credits in comparative politics (including political systems), you are expected to consult with Prof. Saalfeld **before** starting your semester abroad. For the counseling session you have to provide – as far as possible – all necessary information about the classes and credits you would like to have approved by the Chair of Comparative Politics. The transfer of the credits, as far as discussed, will be done after you come back to Bamberg.
