

LEHRSTUHL FÜR STEUERUNG INNOVATIVER UND KOMPLEXER TECHNISCHER SYSTEME MARTIN WIRTZ, M.A.

Education Programme SS17

Seminar: Technocracy Meets Technology: The EU as a Complex System for Complex Tasks (Governance of Complex Systems IV)

Room: FMA/00.06

Time: Tuesday, 10-12 h

Start: 25-04-2017

Short description:

In this seminar, we discuss how the European Union as a complex political system copes with the challenges of regulating innovative and complex technologies. On the one hand, you will thereby get to know the EU itself from an entirely new perspective. On the other hand, you will learn to critically assess the often technocratic approach to technology policy practiced in the EU and elsewhere, which raises far-reaching questions on the role of science in politics as well as politics in science.

Notes:

The seminar will be taught in English.

Registration:

Registration via FlexNow!, from 01st of April until 13th of May. 2017.

Office hours:

Thursday, 12-14 h

Mail:
