## Trump 2.0 and Migration

Trump 2.0 marks a dramatic change in US migration policies. After a few months of Trump in office, unauthorized migration over the Mexico-US border has almost stopped, temporary legal status for four million foreigners is being reviewed and ended, and a campaign to detect and remove the 11-12 million unauthorized foreigners inside the US is underway. This talk will explore what Trump has and is planning to do, and the implications for migrants in the US and around the world.
