

Interdisciplinary Course on Geophysical Applications & Digital Heritage Technologies

MONITORING HERITAGE 2021

International Summer School

Non-invasive structural and subsurface analysis of a historic landmark

- ground-penetrating radar (GPR)
 - metal detection
 - drone photogrammetry
 - structure from motion (SfM)
- be introduced to methodologies, data collection and processing
- learn about implementations into landscape archaeological studies
- gain hands-on technical experience

Course organisers:

Daniel Bursák, Mgr.

Univerzita Karlova/ Institute of Archaeology - CAS

David Daněček, Mgr.

Institute of Archaeology - CAS, Prague

Dr. Alžběta Danielisová

Institute of Archaeology - CAS, Prague

Prof. Dr. Till Sonnemann

Digital Geoarchaeology - University of Bamberg

Florian Linsel, M.A.

Digital Geoarchaeology - University of Bamberg

Investigate a Celtic oppidum near Prague, Czech Republic

Monday 20 - Friday 24, September 2021

UNIVERSITÄT BAMBERG

UNIVERZITA KARLOVA
