Modul PSI-IntroSP-B Introduction to Security and Pri-	6 ECTS / 180 h
vacy	
Introduction to Security and Privacy	
(seit WS18/19)	J

Modulverantwortliche/r: Prof. Dr. Dominik Herrmann

#### Inhalte:

This module introduces students to the most fundamental concepts in the fields of information security and the protection of privacy. It provides a broad overview over the most relevant topics from a technical perspective. The focus lies on practical issues that have to be considered when professional and personal information systems are built and operated.

## Lernziele/Kompetenzen:

Successful students will know the mathematical background behind basic cryptographic primitives and be able to explain fundamental concepts of information security and privacy, including classical attacks and defenses. They will be able to apply their knowledge when implementing simple attack programs and configuring security properties of selected systems.

## Sonstige Informationen:

This module is taught in English. It consists of a lecture and tutorials. During the course of the tutorials there will be theoretical and practical assignments (task sheets). Assignments and exam questions can be answered in English or German.

#### Workload breakdown:

- Lecture: 22.5 hours (2 hours per week)
- Tutorials: 22.5 hours (2 hours per week)
- · Preparation and studying during the semester: 30 hours
- Assignments: 67.5 hours
- Preparation for the exam (including the exam itself): 37.5 hours

## Zulassungsvoraussetzung für die Belegung des Moduls:

keine

Empfohlene Vorkenntnisse:		Besondere
programming languages (Python, C	articipants should have working knowledge of one or more ogramming languages (Python, C, Java) and be familiar with ndamentals of computing, operating systems, and networks.	
Angebotshäufigkeit: WS, jährlich	Empfohlenes Fachsemester:	Minimale Dauer des Moduls: 1 Semester

hrveranstaltungen		
1. Introduction to Security and Privacy	2,00 SWS	
Lehrformen: Vorlesung		
Sprache: Englisch		
Angebotshäufigkeit: WS, jährlich		
Lernziele:		
cf. module description		
Inhalte:		

## Selected topics

- Security Terminology (protection goals, attacker and attack types)
- Software Security in C and Assembler (e.g., buffer overflows, selected defenses)
- Cryptography (e.g., historic ciphers, symmetric and asymmetric systems, Diffie-Hellman key exchange, TLS protocol)
- · Network Security
- Web Security
- · Privacy and Techniques for Data Protection

### Literatur:

# Selected books:

- · A. Shostack: Threat Modelling
- W. Stallings: Computer Security: Principles and Practice
- · J. Erickson: Hacking: The Art of Exploitation

# 2. Tutorials for Introduction to Security and Privacy

**Lehrformen:** Übung **Sprache:** Englisch

Angebotshäufigkeit: WS, jährlich

2,00 SWS

## Prüfung

schriftliche Modulprüfung (Klausur) / Prüfungsdauer: 90 Minuten

zentral organisiert: ja

# Beschreibung:

The content that is relevant for the exam consists of the content presented in the lecture and tutorials (including the assignments). The maximum number of points that can be achieved in the exam is 100.

Participants that solve all assignments correctly can collect up to 20 bonus points. Details regarding the number of assignments, the number of points per assignment, and the type of assignments will be announced in the first lecture. If the points achieved in the exam are sufficient to pass the exam on its own (generally, this is the case when at least 50 points have been obtained), the bonus points will be added to the points achieved in the exam. The grade 1.0 can be achieved without the bonus points.
