## Important information

For safety reasons, the telephone should only be supplied with power:

- using the original power supply unit.
- Part number: L30250-F600-C14x (x: 1=EU, 2=US, 3=UK) or
- in a LAN with PoE (Power over Ethernet), which complies with the IEEE 802.3af standard.

Never open the telephone or a key module. Should you encounter any problems, contact the responsible service personnel.

Use only original Siemens accessories. The use of other accessories may be hazardous and will render the warranty, extended manufacturer’s liability and the CE marking invalid.

## Trademarks

The device conforms to the EU directive 1999/5/EC as attested by the CE marking.

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

Proper disposal and separate collection of your old appliance will help prevent potential damage to the environment and human health. It is a prerequisite for reuse and recycling of used electrical and electronic equipment.

For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service, the shop where you purchased the product or your sales representative.

The statements quoted above are only fully valid for equipment which is installed and sold in the countries of the European Union and is covered by the directive 2002/96/EC. Countries outside the European Union may impose other regulations regarding the disposal of electrical and electronic equipment.
Location of the telephone

- The telephone should be operated in a controlled environment with an ambient temperature between 5°C and 40°C.
- To ensure good speakerphone quality, the area in front of the microphone (front right) should be kept clear. The optimum speakerphone distance is 50 cm.
- Do not install the telephone in a room where large quantities of dust accumulate; this can considerably reduce the service life of the telephone.
- Do not expose the telephone to direct sunlight or any other source of heat, as this is liable to damage the electronic components and the plastic casing.
- Do not operate the telephone in damp environments, such as bathrooms.

Product support on the internet

Information and support for our products can be found on the Internet at: http://www.siemens-enterprise.com/.

Technical notes, current information about firmware updates, frequently asked questions and lots more can be found on the Internet at: http://wiki.siemens-enterprise.com/.

General information

About this manual

This document contains general descriptions of the technical options, which may not always be available in individual cases. The respective features must therefore be individually defined in the terms of the contract.

If a particular function on your phone is not available to you, this may be due to one of the following reasons:

- The function is not configured for you or your telephone. Please contact your system support representative.
- Your communications platform does not feature this function. Please contact your Siemens sales partner for information on how to upgrade.

This user guide is intended to help you familiarize yourself with OpenStage and all of its functions. It contains important information on the safe and proper operation of your OpenStage phone. These instructions should be strictly complied with to avoid operating errors and ensure optimum use of your multifunctional telephone in the network.

These instructions should be read and followed by every person installing, operating or programming an OpenStage phone.

For your own protection, please read the section dealing with safety in detail. Follow the safety instructions carefully in order to avoid endangering yourself or other persons and to prevent damage to the unit.

This user guide is designed to be simple and easy to understand, providing clear step-by-step instructions for operating your OpenStage phone.

Administrative tasks are dealt with in a separate manual. The Quick Reference Guide contains quick and reliable explanations of frequently used functions.

Symbols used in the manual

Operations and settings that can be made both at the phone and over the Web interface are indicated by an icon and page reference.

![Icon] is a reference to an operation or setting performed directly on the phone

![Icon] is a reference to an operation or setting performed via the Web-interface
General information

Service

The Siemens service department can only help you if you experience problems or defects with the phone. Should you have any questions regarding operation, your specialist retailer or network administrator will gladly help you. For queries regarding connection of the telephone, please contact your network provider.

If you experience problems or defects with the phone, please dial the service number for your country.

Intended use

The OpenStage phone is a desktop unit designed for voice transmission and for connection to the LAN. It can also be used as a workstation device. Any other use is regarded as unauthorized.

Telephone type

The identification details (exact product designation and serial number) of your telephone can be found on the nameplate on the underside of the base unit. Specific details concerning your communications platform can be obtained from your service technician. Please have this information ready when you contact our service department regarding faults or problems with the product.

Speakerphone quality and display legibility

- To ensure good speakerphone quality, the area in front of the telephone (front right) should be kept clear. The optimum handsfree distance is 20 in. (50 cm).
- Proceed as follows to optimize display legibility:
  - Turn the phone to tilt the display. This ensures you have a frontal view of the display while eliminating light reflexes.
  - Adjust the contrast as required ⇒ page 183.
Single-line telephone/multi-line telephone

Your OpenStage is a "multi-line telephone". This means that multiple lines can be configured, which is not the case with single-line phones. Each line is assigned an individual phone number which you can use to make and receive calls.

The programmable sensor keys function as line keys on multi-line phones → page 25.

The "Overview" tab on the telephony interface provides information about the lines configured on your phone and the current status of each line → page 38.

When using a multi-line phone to make and receive calls, certain particularities must be taken into account → page 114.
### Getting to know your OpenStage phone

The following sections describe the most frequently used operating elements and the displays on your OpenStage phone.

#### The user interface of your OpenStage

The diagram shows an OpenStage 60/60 G SIP, the description applies to both product variants.

</table>

To avoid damaging your OpenStage phone, make sure you use the adapter cable C39195-Z7704-A5 when connecting a USB stick.

Do not connect a USB hub to the USB master as this can cause stability problems.
Using network ports more efficiently

OpenStage 60/80 SIP has a built-in 10/100 Mbps Ethernet switch. OpenStage 60 G/80 G SIP has a 1000 Mbps Ethernet switch. This means that you can directly connect one additional network device in each case (e.g. a PC) via the telephone with the LAN. The telephone-PC connection option must first be activated on the telephone by service personnel.

Using this connection option saves one network port for each switch used and requires fewer or shorter network cables when arranged correctly.
OpenStage Key Module

The OpenStage Key Module is a key module attached to the side of the phone that provides 12 additional illuminated, programmed keys. Like keys on the phone, these keys can be programmed and used according to your needs → page 24.

You can attach up to two OpenStage Key Modules to your OpenStage 60/80 SIP.

The diagram shows an OpenStage Key Module for OpenStage 80 SIP.
OpenStage Manager

This program offers an additional option for tailoring your OpenStage to your personal needs.

OpenStage Manager is suitable for the following models:
• OpenStage 60 (SIP/HFA)
• OpenStage 60 T
• OpenStage 80 (SIP/HFA)
• OpenStage 80 T
• OpenStage 60 G / 80 G (SIP/HFA)

Features

• Phonebook management
• Assignment of images to contacts
• Synchronization of contacts
• Save and restore
• Key programming
• Screensaver
• Ringtones

Contact your administrator for the latest version of OpenStage Manager.
Keys and controls

Function keys

<table>
<thead>

</tr>
</tbody>
</table>

TouchSlider

Similar to the TouchGuide → page 22, you can set properties for your telephone, such as the volume, by sliding your finger over the TouchSlider.

The blue illuminated slider control displays the volume setting for the current tone (ring tone, handset tone and loudspeaker tone). You can adjust the volume by moving the slider left or right.

Set the lamp brightness of the TouchSlider → page 184.
Mode keys

These sensor keys allow you to switch to the required application with the simple stroke of a key. To select a tab within an application press the relevant key repeatedly until the required tab is displayed.

<table>
<thead>

| Press the \( \text{d} \) key. | In lists and menus:  
• Scroll down  
• Hold down: Jump to the end of the list/menu |
| Press the \( \text{b} \) key. | In lists and menus:  
• Scroll up  
• Hold down: Jump to the start of the list/menu |
| Move your finger around the inner wheel \( \text{w} \). | In lists and menus:  
• Scroll up or down  
In input fields:  
• Select a character in the display keyboard \( \rightarrow \) page 30  
• Set the sensitivity \( \rightarrow \) page 185 |
| Press the \( \text{i} \) key. | Entry selected:  
• Perform action  
• Initiate call |
Browsing in the call list and phonebook tabs

If you are in the phonebook, you normally navigate between the "Personal" and "Corporate" tabs using the ② key or if you are in the call lists you navigate between the "Missed", "Received", "Dialed" and "Forwarded" tabs using the ① key.

Alternatively you can use the TouchGuide to navigate between the tabs.

Firstly use the ③ key to enter the tab row and move left or right using the ④ and ⑤ keys. Once you have reached the required tab, click the ⑥ or ⑦ to change to the associated selection list.

If you are in one of the phonebook or caller lists or in one of the settings menu, you are go back to the telephony interface by repeatedly pressing the ⑧ key.
Programmable sensor keys

Your OpenStage 80 SIP has nine (OpenStage 60 SIP: eight) illuminated sensor keys. You can assign functions or numbers to them.

To open the programming menu, press and hold down the relevant sensor key \(\rightarrow\) page 83.

To activate the programmed function, briefly press the relevant key \(\rightarrow\) page 87.

- Increase the number of programmable sensor keys by connecting a key module \(\rightarrow\) page 18.

Depending on how they are programmed, you can use the sensor keys as:

- Function keys \(\rightarrow\) page 82
- Repdial keys \(\rightarrow\) page 82
- Direct station selection keys \(\rightarrow\) page 122

Touch the key briefly to activate the programmed function or dial the stored number \(\rightarrow\) page 87.

If you hold the key pressed, you are prompted as to whether to start programming this function key.

- If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

A label indicating the key’s function is displayed to the left of the key; it cannot be changed. You can change the labels for repdial keys according to your requirements.

The status of a function is shown by the LED on the corresponding sensor key.

- Line and DDS keys can only be programmed by service personnel via the service menu.

Meaning of LED displays on function keys

<table>
<thead>
<tr>
<th>LED</th>
<th>Meaning of function key</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The function is deactivated.</td>
</tr>
<tr>
<td>Flashing(^1)</td>
<td>Indicates the function status.</td>
</tr>
<tr>
<td>On</td>
<td>The function is activated.</td>
</tr>
</tbody>
</table>

\(^1\) In this manual, flashing sensor keys are identified by this icon, regardless of the flashing interval. The flashing interval represents different statuses, which are described in detail in the corresponding sections of the manual.
Trunk keys (on multi-line phones only)

The programmable sensor keys on multi-line phones function as trunk keys. Each key programmed with the “Line” function is handled as a line. This means up to 9 line keys can be configured on OpenStage 80 SIP and up to 8 on OpenStage 60 SIP.

A distinction is drawn here between primary, secondary and phantom lines. Each of these line types can be used on a private or shared basis → page 26.

Primary line

All multi-line telephones have a primary line. This line can be reached in the usual manner via your public phone number. Incoming calls are signaled on this line.

To avoid conflict between individual multi-line phones, the functions “Do not disturb” and “Call forwarding” can only be used for the primary line.

Secondary line

The secondary line on your phone is used as a primary line by another subscriber of the line trunk group. Your primary line, which is configured on another telephone in the line trunk group, simultaneously functions as the secondary line on that telephone.

Phantom line

Phantom lines are not used as primary lines by any telephones in the line trunk group. Phantom lines are established when the number of lines provided by a communications system exceeds the number of available telephones.
Line utilization

- **Private line**: A line that is used by a single telephone. This line cannot be used as a secondary line by another telephone.
- **Shared line**: A line that is configured on multiple telephones. The line status (if configured) is displayed in the "Overview" tab for all telephones that share this line. If, for example, a shared line is being used by a telephone, a status message indicating that this line is busy is displayed on all other telephones.
- **Direct call line**: A line with a direct connection to another telephone.

The line status is indicated by the LED in addition to the display in the "Overview" tab → page 38.

Keypad

Text input

In cases where text input is possible, you can use the keypad to input text, punctuation and special characters in addition to the digits 0 to 9 and the hash and asterisk symbols. To do this, press the numerical keys repeatedly.

Example: To enter the letter "h", press the number 4 key on the keypad twice. When entering the text, all available characters for this key are displayed. After a short while, the character in focus is displayed in the input field.

To speed up the input, you can confirm your entry by pressing "O" on the navigator after you have selected the required character. To enter a digit in an alphanumerical input field, press the relevant key and hold it down. You no longer need to scroll through the entire list of possible characters.

Alphabetic labeling of dial keys is also useful when entering vanity numbers (letters associated with the phone number’s digits as indicated on the telephone spell a name, e.g. 0700 - PATTERN = 0700 - 7288376).

Getting to know your OpenStage phone

Context-dependent displays

Depending on the situation at hand, the graphic display on your OpenStage phone displays different content, to which you can respond intuitively.

Idle mode

In addition to the status bar and the programmable sensor key list, the graphic display offers a wide range of context-dependent displays.

Idle menu

In idle mode, press ➔ or ➙ on the TouchGuide page 22 to display the idle menu. You can call up various functions here. Entries may vary.

The idle menu may contain the following entries:

- Ringer off
- Do not disturb on
- Directed pickup
Telephony dialogs

The dialogs in the lower area of the display prompt you to input data or provide you with information about the call states.

Example: In idle state, enter a phone number using the dialpad.

Once you have entered the first digit, several options corresponding to the situation are displayed in a dialog menu (pop-up menu) which you can select and confirm using the TouchGuide ➔ page 22.

Messages

The messages displayed in the upper left area of the display advise you of current settings or events.

Example:
- Call forwarding is activated for all calls. All calls are forwarded to the number "220870"
- You received a callback request/voice message in your absence
- A call list contains a new entry

The calls were saved in the missed calls list. Press 📞 to view these calls.

Explanation of all message icons:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>📬</td>
<td>You have received one or more new messages</td>
</tr>
<tr>
<td>📞</td>
<td>One or more new entries have been added to the call lists</td>
</tr>
<tr>
<td>📞</td>
<td>Local call forwarding is activated for all calls</td>
</tr>
</tbody>
</table>
Context menus

If the arrow icon ➤ appears next to a selected entry, additional menu levels or selection options are available in the form of a context menu. Navigate through these options using the TouchGuide ➤ page 22.

You can select and confirm the required functions using the TouchGuide ➤ page 22.

After a connection is set up – you are called or you make call – the context menu appears automatically under the current connection for the configured time (e.g. 20 seconds).

You can define how long the context menu should be displayed. You can deactivate the automatic display so that the ➤ key must be pressed to see the context menu of the connection ➤ page 204.

Idle display context menu

When you press ➤ on the TouchGuide in idle state, the following functions are available (if activated):

First entry (selected when you call up the menu, if you have already dialed a phone number)

Selected entry

Only available when configured to support mobility

Consultation
Hold
Blind transfer call
Disconnect
Directed pickup

First entry (selected when the menu is called up)

Do not disturb on
Repeat dialing 1234
Ringer off
Mobile logon
Cancel call backs
Directed pickup
Getting to know your OpenStage phone

**Pop-up window**
In certain situations, a pop-up window opens automatically in the lower third of the display.

**Pop-up menu**
You will be prompted to use a pop-up menu to select situation-dependant functions and to confirm them or to make entries.
You can use the TouchGuide to navigate within the pop-up menu ➔ page 22.

Example:
The following pop-up menu opens after you change a setting and press the ➔ key on your TouchGuide.

<table>
<thead>
<tr>
<th>Save changes?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save</td>
</tr>
<tr>
<td>Do not save</td>
</tr>
</tbody>
</table>

**Pop-up message**
Pop-up messages only indicate actions or states for which further action is not required.

Example:
The following pop-up message appears briefly when you change a setting.

| Changes saved successfully |
Getting to know your OpenStage phone

Application tab

In many cases you can select further content within an application using tabs.

Example: Press the mode key to open the call lists → page 21. Press this key repeatedly to switch between the various tabs.

The icon displayed to the left of the tab indicates the application you are currently working in.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>☑️</td>
<td>Telephony interface¹ → page 37</td>
</tr>
<tr>
<td>☑️</td>
<td>Phonebooks → page 40</td>

<td>Voicemail → page 46</td>
</tr>
<tr>
<td>☑️</td>
<td>Program/Service menu/Applications menu → page 47</td>
</tr>
<tr>
<td>☑️</td>
<td>Help function → page 49</td>
</tr>
</tbody>
</table>

¹ Platform-dependent; please contact the responsible administrator.
Applications available on your OpenStage phone

The following descriptions provide an overview of the various applications available on your OpenStage phone.

Application navigation

Activating an application
You can switch to the relevant application using the mode keys → page 21.

Scrolling through application tabs
If an application has more than one tab, you can select the tab you want by pressing the mode key repeatedly → page 35.

Scrolling through lists
You can use the TouchGuide to scroll through entries and confirm the functions you want → page 22.

Opening context menus
If the arrow ➔ appears beside an entry, a context menu is available for this entry → page 33.
Applications available on your OpenStage phone

Telephony interface

Single-line view

Additional information is displayed in the telephony interface when your phone rings, when you dial a number or during a call, for instance.

Press 🅱️ to open this interface.

Example:

<table>
<thead>
<tr>
<th>Icon indicating call status</th>
<th>Call duration</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

  - Hold
  - Clear (replace handset)
  - View

- Other line with held call
  - Retrieve
  - View

- Other line busy
  - View

[1]. After a period of time set by service personnel the tab of the selected line is displayed as a preview.
Applications available on your OpenStage phone

Phonebooks

In addition to the local phonebook, this application contains entries from other directory services, such as an LDAP corporate directory.

To activate a specific tab, press repeatedly until the required tab is displayed.

Example:

Phonebook icons

<table>
<thead>
<tr>
<th>Icon</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Primary business number</td>
</tr>
<tr>
<td></td>
<td>Secondary business number</td>
</tr>
<tr>
<td></td>
<td>Mobile phone number</td>
</tr>
<tr>
<td></td>
<td>Private phone number</td>
</tr>
</tbody>
</table>

Search contacts

When in the phonebook or directory list view, press the keypad key that corresponds to the first letter of your search term. A field opens for you to enter the search term:

Enter your search term using the keypad ➔ page 27.

The cursor jumps to the first entry in the list that matches the character you entered in the search field.
**Applications available on your OpenStage phone**

**Personal phonebook**

The "Personal" tab contains your local phonebook. You can store up to 1000 personal contacts in this phonebook. The entries are sorted in alphabetical order in the phonebook list and displayed with the icon for the specified default phone number.

There are two ways of creating new contacts:
- Via the phonebook list context menu → page 143
- Accept entry from LDAP search → page 150

**Contact details**

The type of data displayed for a call in the telephony interface → page 37 is dependent on the information you have stored for the contact in your local phonebook.

A contact consists of the entry in the "First name" or "Last name" fields and at least one phone number → page 143.

In addition, you can store non-telephony-specific data (e.g. address, function, etc.) for each entry.

You can store several phone numbers for each contact. In this case, however, you should define a preferred number → page 144.

Classify your contacts into groups → page 145.

Store a picture of the contact → page 146.

**Managing contacts**

All saved contacts are listed in alphabetical order in the "Personal" tab.

You can use the "Options" context menu to
- create new contacts → page 143
- define contact display format → page 148
- Quick search in the phonebook → page 147
- sort contacts into groups → page 145
- delete the entire phonebook list → page 144

We recommend OpenStage Manager software for the professional management of your contact data and synchronizing your data with Outlook/Notes. For more information, refer to the OpenStage Manager User Manual → page 19.
Using contacts
The following functions are available via the context menu of a selected contact:
- Calling a contact → page 105
- Editing a contact → page 143
- Deleting a contact

LDAP directory
If you have access to an LDAP directory (contact the responsible administrator), you can search contacts in a company-wide directory.
A user-friendly, advanced search function is available for this. You can transfer any entries found to your local phonebook.

Searching for a contact
- Simple search → page 149
- Quick search → page 151

Using a contact
- Calling a contact → page 105
- Transfer entry to local phonebook → page 152
Applications available on your OpenStage phone

Call lists

All calls and numbers dialed on your phone are logged in chronological order in call lists.

Callers with suppressed numbers cannot be saved in the call lists.

The following call lists are displayed individually on separate tabs:
- "Missed" tab: missed calls
- "Received" tab: answered calls
- "Dialed" tab: dialed numbers
- "Forwarded" tab: forwarded calls

Only calls to the primary line are received on multi-line phones (page 14).

When new entries are added to the call lists, a message appears (page 32) on the idle display and the LED of the mode key (page 21) lights up white.

To call up a call list, press repeatedly until the required tab is activated.

Managing call lists

Each call list may contain up to 30 entries. Once this limit is reached, the oldest entry in the log is deleted.

Multiple calls from the same number are only listed once. The number of call attempts is logged in the "Details" context menu.

Example: "Received" tab

<table>
<thead>
<tr>
<th>Time of call</th>
<th>Number of attempts</th>
<th>Additional tabs</th>
</tr>
</thead>
<tbody>
<tr>
<td>10:25</td>
<td>(1)</td>
<td>Time of call</td>
</tr>
</tbody>
</table>

Example: "Options" context menu:
Delete All ➔ page 153
Applications available on your OpenStage phone

Example: “Dialed” tab

The following functions are available via the context menu of a selected entry:
- **Dial** → page 65
- **Details** → page 44
- **Delete** → page 153

**Entry details**

Up to ten call attempts can be stored for each entry in the details list.

Example: entry in the “Missed” tab

Example: entry in the “Dialed” tab

In this view, the context menu contains the following entry: Dial

If a caller is already entered as a contact in the local phonebook, the stored data is displayed.
Managing call lists

Each call list may contain up to 30 entries. Once this limit is reached, the oldest entry in the log is deleted.

Multiple calls from the same number are only listed once. The number of call attempts is logged in the "Details" context menu as well as in the "Missed" log on the list display.

The following functions are available via the "List options" context menu:
- Delete list → page 153
- Sort list → page 153

Using an entry

The following functions are available via the context menu of a selected entry:
- Establish a call to a preferred number → page 106
- View details → page 153
- Delete the entry → page 153
- Transfer entry to personal phonebook → page 154
Applications available on your OpenStage phone

Voicemail

Depending on the type and configuration of your communications platform (contact the relevant administrator), messages from services, such as HiPath Xpressions, can be displayed in this application.

**Voicemail**

Only voicemails for the primary line are received on a multi-line phone (→ page 14).

Example:

(The labels displayed here for the message status may have been altered individually by service personnel).

**Entry details**

The internal player automatically opens as soon as a voicemail is received so you can listen to the message.

**Administration**

Messages that have been opened, retrieved or active in the corresponding tab for longer than three seconds are displayed in gray.

The white LED of the mode key only goes out when all new messages have been retrieved.
Program/Service menu/Applications menu

This menu includes a configuration area for users and administrators, as well as an area for any available applications (contact administrator).

Press repeatedly until the "Settings" tab is active.

Select and confirm the "User" entry using the TouchGuide → page 22.

If necessary, enter the user password → page 158.

User settings

You can adjust local settings for your OpenStage using the "User" menu.
The menu structure comprises several levels.

Adjust the settings on your telephone → page 190.

Audio

Optimize the audio settings on your OpenStage for your environment and according to your personal requirements.

Volumes

Adjust the settings on your telephone → page 194.

Settings

Applications available on your OpenStage phone

**Network information**
Information about the IP address of the phone and HTML address of the Web interface.

View information on the phone ➔ page 217

**Reset phone**
Personal settings made via the telephone menu or the web interface can be reset to factory settings. ➔ page 218

**Administration**
You can access the administration area via the "Admin" function and by entering the administration password.

Refer to the administration manual for your phone for more detailed information on this topic.

During a software update, the phone must not be disconnected from the power supply unit, the LAN line or the phone line. An update action is indicated by messages on the display and/or by flashing LEDs.

**Applications**
E/A Cockpit ➔ page 130

**Help function**
You can call up the "Help" function at any time, even during a call.

**Calling up the "Help" function**
Press 2. The "Help" function is activated.
Applications available on your OpenStage phone

Control and monitoring function

A control or monitoring function can be activated on your phone for service purposes by remote maintenance.

Control function

Service personnel have the option to activate and deactivate features of the phone via remote maintenance. During maintenance the handset, microphone, loudspeaker and headset are deactivated. You are additionally informed on the display that the control function is active.

Monitoring function

In order to detect malfunctioning of a phone for example, the service personnel install a monitoring function. You can use your phone as normal during monitoring. However you will first be informed about the operation with a message on the display and prompted to allow monitoring.

If service personnel have activated a function on your phone, which continuously transmits operating data to a server, you will see the flashing icon  in the upper display line.
Basic functions

Please read the introductory chapters "Getting to know your OpenStage phone" \(\rightarrow\) page 15 and "Applications available on your OpenStage phone" \(\rightarrow\) page 36 carefully before performing any of the steps described here on your phone.

Secure voice transmission

**Prerequisite:** The secure voice communication option must be activated by your administrator.

If you call a party or receive a call from a party over a secure connection, a padlock icon\(^1\) appears on the other party’s row on your graphic display. You can opt to have voice connections that are no longer secure indicated by a brief alerting tone and a window with the message "Unencrypted call" (see \(\rightarrow\) page 200).

Incoming calls

Your OpenStage phone rings with the tone signal set when an incoming call is received. The call is also visually signaled on the call display. If transmitted, calling party information (name, phone number) appears on the graphic display.

If you have set a pattern melody \(\rightarrow\) page 197 or a ringtone \(\rightarrow\) page 196 on your phone, it is possible that service personnel preset a different ringtone or deactivates the ringtone, regardless of the call type (e.g. an external or internal call).

An incoming call will interrupt any ongoing telephone setting operations. As soon as the call ends, press \(\enspace\) to return to the point in the menu structure where you were interrupted.

---

\(^{1}\) Closed for secure or open for nonsecure voice communication
Step by Step

Answering a call via the handset

The phone rings. The caller is displayed.
Lift the handset.
Set the call volume.

Answering a call via the loudspeaker (speakerphone mode)

The phone rings. The caller is displayed.
The pop-up menu opens:
Select and confirm the option shown. The key lights up.
Press the key shown. The speakerphone function is activated.
Set the call volume.

Suggestions for using speakerphone mode:

- Tell the other party that speakerphone mode is active.
- Adjust the call volume while speakerphone mode is active.
- The ideal distance between the user and the phone in speakerphone mode is about 50 cm.
Basic functions

Step by Step

Answering a call with a headset

**Prerequisite:** A headset is connected.

1. Make sure your headset port is set up properly → page 198.

**Answering calls via the headset**

The phone rings. The key flashes.

1. Press the key shown.

2. Set the call volume → page 20.

**Answering calls automatically via the headset**

**Prerequisite:** The service personnel have additionally configured a key with the "Auto-Headset function (AICS Zip tone) (→ page 82).

1. Press the "Auto-Headset" sensor key to activate automatic call answering. This key and the headset key illuminate.

2. A short acoustic signal is heard on the headset for a call and the connection is established.

3. If you want to manually answer calls again, deactivate the automatic answering function using the "Auto-Headset" key. Both keys are off.

---

Make sure your headset port is set up properly → page 198.

Press the key shown.

Set the call volume → page 20.

Press the "Auto-Headset" sensor key to activate automatic call answering. This key and the headset key illuminate.

A short acoustic signal is heard on the headset for a call and the connection is established.

If you want to manually answer calls again, deactivate the automatic answering function using the "Auto-Headset" key. Both keys are off.
Directed pickup

You can pick up a call signaled at an absent coworker’s phone. If a colleague has placed a call on hold on their multi-line phone you can also pick up this call.

Picking up call

Prerequisite: You know the coworker’s internal phone number and the function is configured for you in OpenScape Voice.

A coworker’s phone rings.

Select and confirm the option shown in the idle phone’s context menu.

Lift the handset.

Press the key shown.

Select and confirm the option shown.

Enter and confirm the relevant phone’s internal number. You are connected to the calling party either via the handset or in speakerphone mode.
Picking up a held call:

**Prerequisite:** Your colleague has placed a call on hold on their multi-line phone ➔ page 119. You know the co-worker’s internal phone number and the function is configured for you in OpenScape Voice.

Select and confirm the option shown in the idle phone’s context menu.

- **Lift the handset.**
- **Press the key shown.**

Select and confirm the option shown.

Enter and confirm the relevant phone’s internal number. You are connected to your colleague’s held call either via the handset or in speakerphone mode.
Step by Step

Switching to speakerphone mode

Make note of the two different processes and activate, if necessary, your preferred setting ➔ page 198.

Prerequisite: You are conducting a call via the handset and the microphone and loudspeaker functions have been activated by administrator.

Standard mode

Hold down the key and replace the handset. Then release the key and proceed with your call.

US mode

If the country setting is set to US, you do not have to hold down the loudspeaker key when replacing the handset to switch to speakerphone mode.

Press the key shown.

Replace the handset. Proceed with your call.

A secure voice communication is indicated by a closed padlock icon on the graphic display; a non-secure voice communication is indicated by an open padlock icon on the graphic display (see also ➔ page 51).

Switching to the handset

Prerequisite: You are conducting a call in speakerphone mode.

Lift the handset.

The key shown goes out.
Step by Step

Switching from headset to speakerphone mode

In standard mode

Press and hold the key (open listening ist activated),
Press the key. Speakerphone mode is activated.

In U.S. mode

Press the key
Press the key. Speakerphone mode is activated.

Open listening

People present in the room can silently monitor your call. Let the other party know that you have turned on the loudspeaker.

It is not recommended to activate the open listening feature in connection with a Bluetooth headset &gt; page 223 because this can lead to reduced quality depending on headset and environment.

Prerequisite: You are conducting a call via the handset.

Activating

Press the key shown.

Deactivating

Press the lit key.

Switching to speakerphone mode

Hold down the lit key and replace the handset.
**Ending a call**

Press the key shown.

or

Press the lit key.

or

Select and confirm the option shown in the connection's context menu.
Step by Step

Group call

Your administrator can incorporate multiple telephones in a call pickup group. If your telephone belongs to a pickup group, you can also accept calls intended for other members of the group.

A group call is displayed on the phone. Service personnel may have made the following settings for signaling:

<table>
<thead>
<tr>
<th>Telephone status</th>
<th>Ring on group call = Yes</th>
<th>Ring on group call = No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ringtone on</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Silent in Connection</td>
<td>Ringtone Loudspeaker</td>
<td>Beep Loudspeaker</td>
</tr>
<tr>
<td>Handset</td>
<td>Beep Handset and loudspeaker</td>
<td>Beep Handset and loudspeaker</td>
</tr>
<tr>
<td>Handset Open listening</td>
<td>Beep Handset and loudspeaker</td>
<td>Beep Handset and loudspeaker</td>
</tr>
<tr>
<td>Headset</td>
<td>Ringtone Loudspeaker</td>
<td>Beep Headset</td>
</tr>
<tr>
<td>Headset Open listening</td>
<td>Beep Headset and loudspeaker</td>
<td>Beep Headset and loudspeaker</td>
</tr>
<tr>
<td>Speakerphone mode</td>
<td>Beep Loudspeaker</td>
<td>Beep Loudspeaker</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ringtone off</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Silent in Connection</td>
<td>Nothing</td>
<td>Nothing</td>
</tr>
<tr>

<td>Beep Headset</td>
</tr>
<tr>
<td>Headset Open listening</td>
<td>Beep Headset and loudspeaker</td>
<td>Beep Headset and loudspeaker</td>
</tr>
<tr>
<td>Speakerphone mode</td>
<td>Beep Loudspeaker</td>
<td>Beep Loudspeaker</td>
</tr>
</tbody>
</table>

The volume settings can be found from page 194.
Further service personnel settings for group calls:
- The group call can be picked up both by lifting the handset and via the "Pickup call" menu option.
- The group call be picked up via the "Pickup call" menu option but not by just lifting the handset.
- A key is programmed for call pickup.

A group call is waiting and is indicated on the display by Pickup: Caller for: Party

**Picking up a group call**

The pop-up menu opens:

Confirm the option shown.

- Lift the handset (only if the appropriate function is set by your administrator).
- Press the sensor key programmed with the "Call pickup" function (if configured). The speakerphone function is activated.

**Ignoring a group call**

Select and confirm the option shown. The phone stops signaling the group call.
Making calls

If you selected the option “Busy When Dialing” → page 108, you will not be interrupted by an incoming call. In this case, the caller hears the busy signal.

Off-hook dialing

Lift the handset.
Enter the station number.

In the pop-up menu:
Confirm or wait until the dial delay expires (see → page 107).

In the pop-up menu:
Confirm the option shown.
The connection is set up.

If you are using a dial plan and Immediate dialing is set (see → page 63), dialing is automatically performed as soon as the character string entered matches an entry in the dial plan.
Basic functions

Step by Step

On-hook dialing

The connection is set up with on-hook dialing via the loudspeaker (speakerphone mode) or via a connected headset. The line is seized before dialing.

- Press the key shown.
- Press the key if a headset is connected.

Enter the station number.

- Press or wait until the dial delay expires.
  (see page 107).

In the pop-up menu:

- Confirm the option shown.

First enter the number

First enter the number. The loudspeaker or headset key illuminate when you enter the first digit.

Enter the station number. Use the TouchGuide ➔ page 22 to correct entries as necessary.

In the pop-up menu:

- Confirm or wait until the dial delay expires
  (see page 107).

The connection is set up.

- If you are using a dial plan and Immediate dialing
  is set (see page 63), dialing is automatically
  performed as soon as the character string en-
  tered matches an entry in the dial plan.
Immediate dialing

Immediate dialing should only be activated if service personnel has configured and approved a dial plan.

Immediate dialing is deactivated by default. For this reason after entering the number you must either confirm the "Dial" option or wait until the dial delay expires to set up the connection. If Immediate dialing is configured, your call is automatically dialed as soon as the string entered matches an entry in the dial plan.

Activating or deactivating immediate dialing

You can also configure this setting via the web interface ➔ page 233.

Press the key shown until the “Settings” tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Basic functions

Step by Step

Dialing using the hot or warm line function

Your service personnel can configure a hot or warm line for your phone.

If you lift the handset of the phone or press the loudspeaker key
- with a hot line immediately or
- with a warm line after a defined period of time, a number specified by service personnel is dialed.

Examples:
- The phone in the lift immediately dials the reception number.
- The phone at a patient’s bed dials the ward number e.g. after a minute if no other number is dialed.
Step by Step

Redial

Redialing from the call list

Press the key repeatedly until the application’s “Dialled” tab appears.
Select and confirm the entry you want. The phone number associated with the list entry is dialed.

Redialing from the pop-up menu

Lift the handset.
Press the key shown.
Select and confirm the option shown.
The last phone number entered is dialed.

Redialing from the idle menu

Select and confirm the option shown in the idle display (page 33) context menu. The last phone number entered is dialed.

A secure voice communication is indicated by a closed padlock icon on the graphic display; a non-secure voice communication is indicated by an open padlock icon on the graphic display (see also page 51).
Activating/deactivating the microphone

You can temporarily switch off the handset microphone to prevent the other party from listening in while you consult with someone in your office.

**Prerequisite:** You are conducting a call.

**Deactivating the microphone**

Press the key shown.

**Activating the microphone**

Press the lit key.
Consulting a second party

You can call a second party while a call is in progress. The connection to the first party is placed on hold.

**Prerequisite:** You are conducting a call.

Select and confirm the option shown in the connections’s context menu.

Enter and confirm the second party’s phone number.

If you are using a dial plan and **Immediate dialing** is set (see page 63, dialing is automatically performed as soon as the character string entered matches an entry in the dial plan).

In the pop-up menu:
Confirm the option shown.

If you want to use the **phonebook** or a **call list** for a consultation call, on the context menu select **Consult** instead of **Hold** or press the **Hold** key and open a phonebook or the required call list (page 143).

Alternatively you open a phonebook or call list without using the **Hold** function, the active call is automatically put on **Hold**.

**Ending a consultation call**

Select and confirm the option shown in the context menu.

The consultation call is disconnected. The call with the first party is resumed.
### Canceling a consultation call

**If the called party does not answer**

In the pop-up menu:

Select and confirm the option shown.

The call with the first party is resumed.

**If the called party does answer**

Select and confirm the option shown in the context menu for the connection to the second station.

The call with the first party is resumed.
**Switching to the held party (alternating)**

**Prerequisite:** You are conducting a consultation call  ➔ page 67 or have accepted a second call  ➔ page 96.

Select and confirm the option shown in the connection's context menu.

![Alternate button](image)

It does not matter which context menu is open when alternating. The "Alternate" function appears in both menus (active and passive connection).

You can switch back and forth between two subscribers by repeatedly selecting and confirming "Alternate".

---

**Ending an alternate operation**

**Disconnecting the held call:**

Select and confirm the option shown in the held connection's context menu.

The held call is disconnected. The active call continues.

**Disconnecting the active call:**

Select and confirm the option shown in the active connection's context menu.

The active call is disconnected. The held call remains on hold and can be managed via the context menu.
## Basic functions

### Step by Step

<table>
<thead>
<tr>
<th><strong>Putting on hold and retrieving successively or simultaneously</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Putting an active call on hold</strong></td>
</tr>
<tr>
<td><strong>Prerequisite:</strong> You are conducting a consultation call → page 67 or have accepted a second call → page 96. The &quot;Hold&quot; sensor key must be configured → page 82.</td>
</tr>
<tr>
<td>Press the &quot;Hold&quot; key. The key lights up. The consultation or second call and the first call are put on hold.</td>
</tr>
<tr>
<td><strong>Retrieving the first call</strong></td>
</tr>
<tr>
<td>Switch to the first call.</td>
</tr>
<tr>
<td>Press the illuminated &quot;Hold&quot; key. You are connected with the other party. The consultation or second call continues on hold.</td>
</tr>
<tr>
<td><strong>Retrieving the second call</strong></td>
</tr>
<tr>
<td>Switch to the held consultation or second call</td>
</tr>
<tr>
<td>Press the illuminated &quot;Hold&quot; key. You are connected with the other party. The first called is put on &quot;Hold&quot; again.</td>
</tr>
</tbody>
</table>
### Connecting parties

You can join the first party with the party you consulted, clearing down your connection to both parties in the process.

**Prerequisite:** You are conducting a consultation call ➔ page 67 and call joining must be allowed ➔ page 71.

Select and confirm the option shown in the active connection’s context menu. The other two parties are now connected to one another. You can now hang up.

**Connect by hanging up**

Replace the handset or, if you are in speakerphone mode, press the loudspeaker key. The other two parties are now connected to one another.

**Allowing call joining**

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the “Settings” tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Call forwarding

You can forward calls for your phone to another phone.

**Prerequisite**: The call forwarding function is programmed \(\rightarrow\) page 75.

Three forwarding conditions can be programmed in the forwarding menu:

- All Calls
- Busy
- No reply

Because of its direct impact, "All Calls" call forwarding has the highest priority followed by "No reply" and "Busy".

If active, "All Calls" call forwarding is indicated on the graphic display when the phone is idle.

Forwarded calls can be logged in a call list \(\rightarrow\) page 43.

There are three Destination options in the Edit call forwarding menu. These destination options are assigned to the forwarding types.

All calls (off/on)

**Destination**

Busy (off/on)

**Destination**

No reply (off/on)

**Destination**

One phone number may already be assigned to each destination. The Destination option could then be Destination 12345, for instance.
**Programming call forwarding**

You can also configure this setting via the Web interface ➔ page 233.

**Saving destination phone numbers for call forwarding**

You can save up to five destination phone numbers for call forwarding. These destination phone numbers can then be assigned different forwarding conditions.

Press the key shown.

You can also enter the call forwarding settings via the user menu (➔ page 91).

The pop-up menu opens:

Select and confirm the option shown.

Select and confirm the option shown.

You can save destination phone numbers by selecting the “Destination” option for the relevant forwarding condition.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.

Enter and confirm the destination phone number. If necessary, define additional destination phone numbers.

Select and confirm the option shown.

**Assigning a destination phone number to a call forwarding instruction**

Press the key shown.

The pop-up menu opens:

Select and confirm the option shown.

An overview of call forwarding settings appears.

**Edit call forwarding**

**Destination**

**Edit favorites**

**Destination 1**

**Save & exit**

**Edit call forwarding**
Basic functions

Step by Step

Select and confirm the option shown for the call forwarding condition you want.
Select and confirm the destination phone number you want.
Select and confirm the option shown.

Defining the ring duration before call forwarding on no reply

You can define how long the phone should ring before the “No reply” form of call forwarding activates.

You can also configure this setting via the Web interface ➔ page 233.

Prerequisite: The phone is idle.

Press the key shown.
The pop-up menu opens:
Select and confirm the option shown.
An overview of call forwarding settings appears.
Select and confirm the option shown.
Enter the required time in seconds.
Select and confirm the option shown.

Destination
08972228596
Save & exit

Edit call forwarding
Duration
Save & exit
Activating/deactivating call forwarding

**Prerequisite:** At least one destination phone number is programmed \( \rightarrow \) page 73.

You can also configure this setting via the Web interface \( \rightarrow \) page 233.

Press the key shown.

The pop-up menu opens:

Select and confirm the option shown.

An overview of call forwarding settings appears.

Select and confirm to activate or deactivate.

Select and confirm to activate or deactivate.

Select and confirm to activate or deactivate.

Select and confirm the option shown.
Activating call forwarding for all calls

Use the `r` function key to activate or deactivate call forwarding directly for all calls.

You can also configure this setting via the Web interface → page 233.

**Prerequisite:** At least one destination phone number is programmed → page 73.

Press the key shown.

The pop-up menu opens:

The pop-up menu disappears after around five seconds and the `r` key lights up.

or

Confirm the option shown. The `r` key lights up.

Call forwarding is activated for all calls.

If the phone is idle, the call forwarding icon ✅ appears on the graphic display with the destination phone number.

**Deactivating call forwarding for all calls**

Press the lit key.

The pop-up menu opens:

The pop-up menu disappears after around five seconds and the `r` key goes out.

or

Confirm the option shown. The `r` key goes out.

Call forwarding is deactivated for all calls.
Step by Step

Call forwarding chain

Sometimes calls to a station are forwarded to another station which also has call forwarding or DND activated. This can create a call forwarding chain consisting of several telephones where the last member of the chain is your phone.

A popup window opens on your phone’s screen with the following information:
- Who is calling
- Who forwarded first or last.
- The reason for the forwarding is displayed by an icon.

You can set whether the station that forwarded first or last is displayed (see page 91).
Step by Step

Callback

You can request a callback if the station called is busy or if nobody answers. You receive a callback when the other party’s line becomes free.

This option must be activated by your administrator.

On multi-line telephones ➔ page 14, only the callback requests for your primary line are logged.

Requesting callback

**Prerequisite:** The station called is busy or nobody answers.

In the pop-up menu:
Select and confirm the option shown.

Deleting callback requests

You can delete scheduled callback requests if you no longer need to return a call, for example, because you have met the other party in person.

**Prerequisite:** A callback was requested.

Select and confirm the option shown in the idle display (➔ page 33) context menu.

Confirm in the pop-up menu. All callback requests are deleted.
Basic functions

Responding to a callback

**Prerequisite:** A callback was requested. Your phone rings and station information appears on the graphic display.

The pop-up menu opens:

**Accepting a callback**
Select and confirm the option shown.

**Rejecting a callback**
Select and confirm the option shown.

The callback request is deleted. The caller hears the busy signal. The caller’s phone number is added to the missed calls list.

**Forwarding a callback**
Select and confirm the option shown.

Enter and confirm the phone number.
Permitting a callback

Permitting callback on busy/no reply

You can also configure this setting via the Web interface ⇒ page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Calling back missed calls

Calls received while you are absent are indicated by a message (page 32) on the idle display. In addition, the mode key lights up white.

Missed calls are logged in the missed calls list. This list provides information on the missed call and lets you call back the number directly.

On multi-line telephones page 14, only the calls missed on your primary line are logged.

Press the key until the application’s “Missed” tab appears.

Select and confirm the appropriate list entry. The phone number is dialed.

For a detailed description of the call lists, see page 43.
Programmable sensor keys

The phone features a range of functions that can, if required, be programmed on programmable sensor keys.

The phone comes with nine (OpenStage 80) or eight (OpenStage 60) sensor keys, all of which can be programmed on two separate levels.

The sensor key for switching between the two sensor key levels is preassigned (shift key). This programmable sensor key should be maintained where possible so you can switch between the two programmable sensor key levels.

The labels for the sensor keys are displayed on the right edge of the display.

The sensor keys can also be programmed via the web-interface → page 233.

List of available functions

1. Delete (not assigned) 17. Group pickup
2. Selected dialing 18. Repertory dial
3. Repeat dialing 19. Feature toggle
4. Forward all calls 20. Mobility
5. Forward no reply 21. Directed pickup
6. Forward busy 22. Callback
7. Ringer off 23. Cancel callbacks

16. Do not disturb 32. Send URL
Programmable sensor keys

Step by Step

Programming sensor keys

Beginning programming

Directly via a sensor key

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirms to begin programming. The sensor key illuminates continuously.

or

Via the user menu

You can also program keys via the user menu.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown. You are prompted to press the key you wish to program.

Press the sensor key you want to program with a function. The sensor key illuminates continuously.

Beginning programming

Select and confirm the option shown to program the first level.

or

Select and confirm the option shown to program the second level.

In the context menu select and confirm the required function (e.g. Do not disturb).
Step by Step

Select and confirm the option shown if you want to change the label on the graphic display.

Enter and confirm the label you want.

Select and confirm the option shown.

Programming enhanced functions

Repertory dial

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirm to begin programming. The sensor key illuminates continuously.

Select and confirm the option shown.

Select and confirm the function in the context menu.

Select and confirm the option shown if you want to change the label on the graphic display.

Enter and confirm the label you want (for example, the destination station).

Select and confirm this option to enter a destination phone number.

Enter and confirm the station’s destination phone number.

You can select and insert special characters in the dialing sequence:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Calls up the special characters menu</td>
</tr>
<tr>
<td></td>
<td>Disconnects the call</td>
</tr>
</tbody>
</table>
Programmable sensor keys

Step by Step

Select and confirm the option shown.

Select and confirm the function in the context menu.

Select and confirm to change the key labeling.

Select and confirm this option to enter a code.

Select and confirm the option shown.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="icon1" alt="Icon" /></td>
<td>Activates a consultation hold</td>
</tr>
<tr>
<td><img src="icon2" alt="Icon" /></td>
<td>Enables a normal call</td>
</tr>
<tr>
<td><img src="icon3" alt="Icon" /></td>
<td>Enters a pause, for example, for international dialing</td>
</tr>
</tbody>
</table>

Save & exit

Feature toggle

Only available for Hunt group functions (→ page 174).

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirm to begin programming. The sensor key illuminates continuously.

Select and confirm the option shown.

Select and confirm the function you want (for example, “busy/free”).

Select and confirm this option to enter a code.

Enter the code (see Code list table → page 182) and confirm.

Select and confirm the option shown.

The repertory dial can be up to 40 characters long.

Save & exit

Icon Function

Save & exit

The repertory dial can be up to 40 characters long.

Feature toggle

Only available for Hunt group functions (→ page 174).

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirm to begin programming. The sensor key illuminates continuously.

Select and confirm the option shown.

Select and confirm the function in the context menu.

Select and confirm to change the key labeling.

Enter and confirm the label you want (for example, “busy/free”).

Select and confirm this option to enter a code.

Enter the code (see Code list table → page 182) and confirm.

Select and confirm the option shown.

Save & exit

The repertory dial can be up to 40 characters long.

Feature toggle

Only available for Hunt group functions (→ page 174).

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirm to begin programming. The sensor key illuminates continuously.

Select and confirm the option shown.

Select and confirm the function in the context menu.

Select and confirm to change the key labeling.

Enter and confirm the label you want (for example, “busy/free”).

Select and confirm this option to enter a code.

Enter the code (see Code list table → page 182) and confirm.

Select and confirm the option shown.

Save & exit

The repertory dial can be up to 40 characters long.
Programmable sensor keys

**Step by Step**

**Forwarding**

Hold down the sensor key to which a function should be assigned until the programming prompt is displayed.

If the prompt is not displayed or a programmed function is not executed, then you can only launch key programming via the user menu (ask your service personnel about the current setting).

Confirm to begin programming. The sensor key illuminates continuously.

Select and confirm the option shown.

Select a forwarding type:
- Forward all calls
- Forward no reply
- Forward busy

Select and confirm the function in the context menu.

Select and confirm the option shown if you want to change the label on the graphic display.

Accept or edit the label and confirm.

Select and confirm this option to enter the forwarding destination.

Enter and confirm the phone number of the forwarding destination.

Select and confirm the option shown.
Programmable sensor keys

Using sensor keys

The use of programmed functions depends on the phone’s status. The relevant display appears once you have pressed a sensor key.

Example 1: Calling saved number

**Prerequisite:** The idle menu is displayed on the display.

- Press the sensor key for a saved number. The connection is set up.

Example 2: Call Waiting Activating/deactivating

You can press a key to activate or deactivate call waiting functionality, even during a call. The prerequisite for this is that a second call is permitted (page 98). By default a second call is permitted.

- Press the “Call Waiting” sensor key. The sensor key goes out. The second call function is deactivated. The call is rejected or forwarded.

Example 3: Immediate ring

This function allows you to switch the preset delay (page 139) on and off for all line keys. By default the delay is set, the key does not illuminate.

- Press the “Immediate ring” sensor key. The sensor key illuminates. The delay ringtone is disabled. An incoming call rings immediately regardless of what delay time is configured.
Resetting sensor keys

You can reset sensor keys you configured to factory settings (see also → page 218).

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown to switch to the Reset user data menu.

Select.

Select and confirm the option shown in the context menu to delete the content of the sensor keys.

Select.

Select and confirm "Reset selected user data" in the context menu. The contents of the sensor keys you configured are deleted.

Keys which can only be configured by service personnel remain unchanged.
Enhanced phone functions

Incoming calls

Rejecting a call
You can reject an incoming call.

In the pop-up menu:
Select and confirm the option shown.
The caller hears a busy signal.

If the rejected caller’s phone number is transmitted, it is saved in the call list. You can then call this party back at a later time.

Deflecting a call

Using call deflection

Prerequisite: An incoming call is displayed or signaled.

In the pop-up menu:
Select and confirm the option shown.
The call is immediately deflected if a destination phone number (⇒ page 90) is programmed.

or

If you did not set a phone number when programming call deflection, a pop-up menu appears prompting you to enter a destination phone number for call deflection.

Enter and confirm the destination phone number.
The call is deflected.
Enhanced phone functions

Step by Step

**Permitting call deflection**

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Enter and confirm the phone number to which the station should be deflected.

Entering a destination phone number is not mandatory when call deflection is active. If you want to deflect a call, you are prompted to enter a destination phone number if there is none stored.

**Deflecting to a DSS number**

A call can be deflected to a direct station selection (DSS) subscriber using the DSS key, if the key is configured and the deflect function is activated by your service personnel → page 124.

Information only, as set by service personnel: Yes or No.
Step by Step

Configuring call forwarding

You can also enter the call forwarding settings via the Forwarding key (→ page 73).

Press the key shown until "Settings" is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

For a description of the settings, see the explanation starting on → page 72.

Configuring call forwarding

Select and confirm the option shown.

For a description of the settings, see the explanation starting on → page 72.

Setting alerts

Use the Call forward alerts menu to enable and disable visual and audible alerts for call forwarding (not possible with the Forwarding key).

Select and confirm the option shown.

Select the option shown.

Select and confirm the option shown in the Yes/No context menu.

Select the option shown.

Placing a call on hold

You can use this function to place an ongoing call on hold, for instance, to prevent the other party overhearing a conversation with a colleague in the same room. The held party hears music on hold if Music on hold is active on this party’s phone (⇒ page 95).

Prerequisite: You are conducting a call.

Select and confirm the option shown in the connections’s context menu.

or

Press the “Hold” key. The key lights up. (The “Hold” sensor key must be configured ⇒ page 82.)

Retrieving a held call:

Select and confirm the option shown in the connections context menu.

or

Press the illuminated “Hold” key. (The “Hold” sensor key must be configured ⇒ page 82.)

Using line keys

On multi-line telephones you can use the line keys to place ongoing calls on hold.

Press the corresponding trunk key. The line key LED starts flickering. The call is now on hold.

Retrieving a held call:

Press the corresponding trunk key. The line key LED lights up. The call is retrieved.
Step by Step

The LED display \(\rightarrow\) page 26 or status display on the “Overview” tab \(\rightarrow\) page 38 indicates that the call is on hold to other multi-line telephones where this line is also configured. These phones can then pick up the call.

**Held call wait status**

After placing a call on hold, you can replace the handset and then decide if the call should be retrieved or disconnected.

**Prerequisite:** You placed a call on hold and replaced the handset.

In the pop-up menu:

Select and confirm the option shown to resume the call in speakerphone mode.

Select and confirm the option shown to disconnect the call.

**Activating/deactivating the hold reminder tone**

You can also configure this setting via the Web interface \(\rightarrow\) page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.
Enhanced phone functions

Step by Step

**Setting the hold reminder time**

Use "Hold reminder" to specify when you want to receive an automatic reminder about a held call. The minimum time value is 1, that is, the reminder is output after one minute. The maximum value is 99 minutes. Press 0 to deactivate the reminder.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until "Settings" is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Enter a value between 3 and 15 and confirm.

Select and confirm the option shown.
## Enhanced phone functions

### Step by Step

**Music on hold**

Music on hold is played back when you are placed on hold by another party, providing this option is active.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until "Settings" is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.

Call waiting (second call)

You can accept a second incoming call in the course of an ongoing call. The caller hears the on-hook signal while you hear a call-waiting signal tone.

You can reject or accept the second call. Before you accept the second call, you can end the first call or place it on hold for subsequent retrieval.

You can block the second call or the signal tone (page 98).

Accepting a second call

Prerequisite: You are conducting a call and call waiting is allowed (page 98).

In the pop-up menu:

Select and confirm the option shown.

You can talk to the second party.

The connection to the first party is on hold.

You can still

- toggle between an initial and second call or
- put on hold and retrieve second and first call successively (page 70)
- initiate a conference

Consultation call from second call

If the second call is your active call you can initiate a consultation call from it.

From a consultation call in the second call you can

- initiate a conference
- toggle between the second call and a consultation call
- put on hold and retrieve second and consultation call successively (page 70)
- transfer a call
- disconnect the calls again

During a consultation in the second call, the first call is parked and can only be unparked when the consultation or second call ends or these calls were connected.

Disconnect second call

Select and confirm the option shown in the second call’s context menu. The call to this station is disconnected and the call to the first station is reconnected.
Enhanced phone functions

Step by Step

**Ignoring second call**

***Prerequisite:* You are conducting a call and call waiting is allowed (➔ page 98).

In the pop-up menu:
Select and confirm the option shown.
The caller still hears the on-hook signal. You can subsequently Accept, Reject or Deflect the second call.

While the ignored second call continues to wait, from the active call you can:
- make a consultation call
- initiate a conference
- toggle between the consultation call and your call party
- transfer a call

A third call would be rejected with the busy signal

If you have disconnected the first call, the ignored second call rings like a normal call.

**Rejecting a second call**

***Prerequisite:* You are conducting a call and call waiting is allowed (➔ page 98).

In the pop-up menu:
Select and confirm the option shown.

The second call is rejected. The caller hears the busy signal. The caller’s phone number is added to the missed calls list.

**Deflecting a second call**

***Prerequisite:* You are conducting a call and call waiting is allowed (➔ page 98).

In the pop-up menu:
Select and confirm the option shown.

Enter and confirm the phone number.
The second call is deflected to the destination specified.
Enhanced phone functions

**Step by Step**

**Connecting parties**
Select and confirm the option shown in the active connections context menu. The other two parties are now connected to one another. You can now hang up or dial another number for instance.

**or Connect by hanging up**

**Prerequisite**: Connecting by hanging up is activated (ask your service personnel) and “Toggle associate” must be set to “yes” (page 99). Before you can be connected by hanging up you must have toggled at least twice (page 99).

Replace the handset or, if you are in speakerphone mode, press the loudspeaker key. The other two parties are now connected to one another.

**Allowing call waiting**
You can also configure this setting via the Web interface page 233.

**Prerequisite**: The option was programmed by your administrator.

Press the key shown until the “Settings” tab is active.
Confirm the option shown.
Enter and confirm the user password.
Select and confirm the option shown.
Select and confirm the option shown.
Select and confirm the option shown.
Select and confirm the option shown in the context menu.
Step by Step

Select and confirm the option shown.

When **Allow call waiting** is activated, you can toggle the configured sensor key to switch call waiting on/off (→ page 87).

**Toggling associate**

Set the "Toggle associate" function to Yes if you want to connect to a second or pickup call by hanging up.

You can also configure this setting via the web interface → page 233.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Step by Step

**Transferring a call**
You can transfer your current call to another party with or without consultation.

**Blind transfer**

**Prerequisite:** You are conducting a call. The options "Allow call transfer" and "Transfer on ring" were selected (→ page 101).

Select and confirm the option shown in the connection’s context menu.

Enter and confirm the phone number of the second party to whom you want to transfer the call.

The graphic display returns to idle following successful transfer.

**Transferring with consultation**
You can announce a call to a recipient before transferring it.

**Prerequisite:** You are conducting a call. The options "Allow call transfer" and "Transfer on ring" were selected (→ page 101).

Select and confirm the option shown in the connection’s context menu. The call is placed on hold.

Enter the phone number of the party to whom you want to transfer the call.

Confirm the option shown.

**If the party answers:**
Announce the call you want to transfer.

Select and confirm the option shown in the connection’s context menu.

**If the party does not answer:**
You do not have to wait for the second party to answer before you can transfer the call.

Select and confirm the option shown in the connection’s context menu.
Enhanced phone functions

Step by Step

Replace the handset or, if speakerphone mode is active, press the lit key to transfer the call.

If the party does not answer, you will be called back by the first party.

**Allowing call transfer**
You can also configure this setting via the Web interface page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Enhanced phone functions

Step by Step

Allowing "Transfer on Ring"

If this option is allowed, you can activate call transfer by replacing the handset even before the called party answers.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
CTI calls

Beep on auto-answer

Speakerphone mode activates automatically on your phone if you use a CTI application (such as Outlook) to dial a number when Auto Answer is active. If Auto Answer is not active, the phone rings first and you have to press the loudspeaker key or lift the handset to set up the call. This setting also defines whether or not incoming calls are automatically accepted. If the function is active, an alert beep sounds when a call is automatically accepted. Details regarding special application are provided on page 123.

Information on the operation of the configured CTI application can be found in the corresponding user guide.

You can also configure this setting via the Web interface on page 233.

Prerequisite: The option was programmed by your administrator.

Press the key shown until the "Settings" tab is active.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Dialing with the DDS key

You can program frequently used phone numbers on programmable keys (→ page 82). If you press a direct destination selection key for around three seconds, the associated contact or phone number appears and dialing is initiated.

**Prerequisite:** A direct destination key is programmed → page 82.

Press the programmed DDS key. Dialing is initiated.

Dialing from the local phonebook

Press the key shown.

- Select and confirm a contact. The phone number is dialed.
- Select and confirm the option shown in the context menu.
- Select and confirm the preferred phone number. The phone number is dialed.

For detailed information about the local phonebook, see from → page 143.

Dialing from the LDAP database

**Prerequisite:** You searched for and selected an entry in the LDAP database (→ page 149).

Select the entry you want.

- Select and confirm the option shown in the context menu. The connection is set up.
- For detailed information about the LDAP database, see from → page 149.
Dialing a phone number from a list

Press the key until the application table for the relevant call list is active.

Select and confirm the entry you want. The phone number associated with the list entry is dialed.

If the party listed is already in the phonebook, the appropriate phone number icon is displayed on page 143. If there are several numbers stored for the party in the phonebook, these can also be selected in the context menu.

Calling a contact from a group

Press the key shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the group you want.

Select and confirm the option shown in the context menu.

Select and confirm a group member. The phone number is dialed.

A phone number icon is displayed if the party is already stored as a contact in the phonebook on page 143. If there are several numbers stored for the party in the phonebook, these can also be selected in the context menu.
Step by Step

Using autodial delay

A number is automatically dialed after a set delay starting from the entry of the number’s last digit. The autodial delay can be used:
- when dialing in idle mode
- when deflecting an incoming call
- Consultation
- when transferring an answered call.

The delay can be reduced by performing one of the following activities:
- pressing the i key. This always works.
- lifting the handset. This only works if the phone number was entered when the phone was idle or if it was entered for a consultation call when the handset was off hook.
- pressing the loudspeaker key. This only works if the phone number was entered when the phone was idle and the loudspeaker key was not lit or if the phone number was entered for a consultation call and the loudspeaker key was not lit.

If an emergency number is preset by your administrator, the autodial delay for this phone number is reduced to one second.

Settings for autodial delay

You can also configure this setting via the Web interface page 233.

The setting does not affect automatic emergency number dialing.

If you select Autodial delay, you must either confirm the "Dial" option, press the loudspeaker key or wait until the autodial delay expires to set up a call when dialing with the handset on hook.

Press the key shown until the "Settings" tab is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.
Enhanced phone functions

**Step by Step**

1. **Outgoing calls**
   - Select and confirm the option shown.

2. **Autodial delay**
   - Select and confirm the option shown.

3. **Save & exit**
   - Specify a value and confirm your entry.
   - Select and confirm the option shown.

**Allowing “Busy When Dialling”**

If you activate this function, an incoming call received while you are performing dialing is rejected. The caller then hears the busy signal.

- Press the key shown until the “Settings” tab is active.

   - Confirm the option shown.

   - Enter and confirm the user password.

- Select and confirm the option shown.

   - Select and confirm the option shown.

   - Select and confirm the option shown.

   - Select and confirm the option shown in the context menu.

   - This setup option can also be found under “Handling” in the “Incoming calls” menu.

Automatic dial delay does not work if you are using a dial plan and **Immediate dialing** is configured (see page 63). The number is automatically dialed as soon as the string entered matches an entry in the dial plan.
Step by Step

Conference

Local conference

This type of conference is also referred to as a three-party conference. It involves up to three participants.

Prerequisite: You are conducting a consultation call → page 67 or have accepted a second call → page 96, and the conference function is active → page 110.

Initiating a local conference

You can initiate a conference by calling the “Conference” function in the context menu of either the active or held call.

Select and confirm the option shown in the connection’s context menu. You are connected to both parties at once. The conference is displayed.

Conducting one-to-one calls

Select the connection you want to clear down.

Select and confirm the option shown in the context menu. You are now involved in a one-to-one call with the remaining call party.

If you already are involved in a secure connection with a party when you initiate a consultation call, the original party is placed on hold. The new consultation connection can be either secure or non-secure. However, the first connection remains secure even if all three parties are now joined together in a conference.

The entire conference is nonsecure if the connection to at least one of the parties is not secure (see also → page 51).

The relevant padlock icon appears on the “Conference” row.
### Enhanced phone functions

#### Step by Step

**Ending a local conference**

**Allowing call partners to continue a conference after you exit**

**Prerequisite:** The function “Allow join in conference” (page 111) was activated.

Select and confirm the option shown in the “Conference” context menu.

Replace the handset or, if you are in speakerphone mode, press the loudspeaker key. Both call partners remain connected. You are disconnected from the conference call.

**Disconnecting a party**

Select and confirm the option shown in the “Conference” context menu. Both connections are cleared down – the conference is cleared down.

**Allowing a local conference**

This option allows or blocks the “Local conference” function.

You can also configure this setting via the Web interface (page 233).

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
## Enhanced phone functions

### Step by Step

#### Allowing joining in a local conference

You can use this option to decide whether or not your call partners are allowed to join calls after you exit the conference call.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

- Enter and confirm the user password.
- Select and confirm the option shown.
- Select and confirm the option shown.
- Select and confirm the option shown in the context menu.
- Select and confirm the option shown.

Step by Step

**System-supported conference**

This type of conference is also referred to as a large conference. It can include up to ten parties.

**Prerequisite:** You are conducting a consultation call ➔ page 67 or you have accepted a second call ➔ page 96, and the "Centralized conference" feature was configured by your administrator.

**Establishing a conference**

Select and confirm the option shown in the connection’s context menu. You are connected to the first two parties at once. The conference is displayed with the current participants. You can now:
- initiate a consultation call
- put the conference on hold
- leave the conference.

**Conducting a consultation call**

Select and confirm the option shown in the "Conference" context menu. If the party answers, you can:
- toggle between the party and the conference
- connect the consultation call to another called party
- end the consultation call and return to the conference
- add the consultation call party to the conference.

**Adding a party**

**Prerequisite:** You are conducting a consultation call and the conference is on hold.

Select and confirm the option shown in the consultation call's context menu. The party is added to the conference. Only the conference and all current participants are now displayed.

**Putting the conference on hold**

Select and confirm the option shown in the "Conference" context menu. The conference is placed on hold and you can consult with someone in your office, for instance.
Leaving a conference

Select and confirm the option shown in the "Conference" context menu. You are disconnected from the conference call and can dial another number, for instance. The other call partners remain connected.

If using the "Centralized conference" option, the Conference row contains a closed padlock icon for a secure voice connection and an open padlock icon for a nonsecure voice connection (→ page 51).

The display depends on whether the conference server supports secure voice communication. The appropriate display is set by the conference server.
Making calls with multiple lines

You can use your OpenStage 60/80 as a multi-line phone. If you have any questions regarding how to configure your OpenStage phone as a multi-line phone, please contact your administrator.

The following is a description of the telephony scenarios for multi-line phones. To facilitate comprehension, you should familiarize yourself with the enhanced telephony application and how to use the line keys beforehand. Furthermore, you can specify individual settings for your multi-line telephone. Refer to the following sections for a detailed description of the individual components:

- Introduction to multi-line phones → page 14
- Lines and line keys → page 25
- Multi-line telephony interface → page 38
- Individual settings → page 138

Incoming calls

Depending on your individual settings, you will be notified of incoming calls → page 197.

Accepting calls for the primary line

In this case, the telephone behaves in the same way as a single-line telephone. See → page 51 and → page 89.

Accepting calls for secondary lines

**Prerequisite:** The secondary line is configured on your multi-line telephone.

**Using the handset**

Lift the handset. Conduct call.

The line that rings is automatically selected. If calls are ringing on more than one line, you will be connected to the line that has been ringing the longest.
Making calls with multiple lines

Step by Step

Using the line keys

Press the flashing trunk key.

Speakerphone mode.

or

Accept

Confirm the option shown.

Speakerphone mode.

Making calls

You must seize a line before you can make calls on a multi-line telephone.

Trunk seizure can be configured on an individual basis. Your administrator can determine if the lines on your telephone can be automatically seized and with which priority.

If you have seized a secondary line, this line is reserved for you for making calls for a specific period as defined by the administrator. No other user can seize this line during this period, even if the line is also assigned to this user’s telephone.

Manual trunk seizure

Lift the handset or press the speakerphone mode or headset key.

Press the required trunk key.

or

With the handset on hook, press the key shown until the application tab Overview is active ➔ page 38.

Select and confirm the required line (e.g. line 2). The tab for this line is displayed.

Enter the phone number or use redial, for example. The connection is set up.
Making calls with multiple lines

Step by Step

Automatic trunk seizure

Prerequisite: Your administrator has configured automatic trunk seizure.

Lift the handset or press the speakerphone mode or headset key.

The line defined during configuration is seized.

Enter and confirm the phone number. The connection is set up.

Dialing the last dialed number

The last phone number dialed on your telephone – on the primary line in the case of line keys – is displayed for redialing in a pop-up menu.

Lift the handset or press the speakerphone mode or headset key.

Seize the required line (page 115).

In the pop-up menu:

Confirm the option shown. The connection is set up.

Forwarding calls on primary line

The call forwarding can only be activated for the primary line. Which call forwards are possible, how they are configured and activated can be found from page 72.

Call forwarding information

Prerequisite: Your service personnel has activated “Forwarding shown”.

If you have activated one of the forwarding types on your phone for the primary line and a station calls, a popup window with the following information opens:
• Who is calling
• The forwarding destination.

Redial {1} 123456
Making calls with multiple lines

Step by Step

During calls

Making and receiving calls on a single line

If you only use one line on your multi-line telephone to make calls, and you receive calls on the same line, the phone operates in the same way as a single-line telephone:

- Redial ➔ page 65
- Consultation ➔ page 67
- Toggle/Connect ➔ page 69
- Callback ➔ page 78
- Hold ➔ page 92
- Call waiting (second call) ➔ page 96
- Transferring a call ➔ page 100
- Conference ➔ page 109

Functions available exclusively for the primary line:

- Call lists ➔ page 43
- Voicemail ➔ page 46
- Call forwarding ➔ page 72
- Do not disturb ➔ page 156

Depending on your individual settings, you will be notified of incoming calls ➔ page 142.
Making calls with multiple lines

Step by Step

Making and receiving calls with multiple lines

Accepting a waiting call

Depending on the settings for “Rollover”, you will be notified of incoming calls page 142.

Prerequisite: You are conducting a call. At the same time, a call is incoming on another line.

Call on line 1.
Press the line key for line 2. The call on line 1 is placed on hold.

All multi-line users that share the line on which the call is being held (page 26) can now pick up the held call. To prevent other users from answering the held call, you must place the call on "Consultation" hold page 67.

Depending on the setting made by your administrator, you may have to press the trunk key twice to accept the call on the other line. The first call is either placed on hold or released depending on the setting.

Conduct call on line 2.
End call on line 2.
Press line key for line 1.
Retrieve call on line 1.
Making calls with multiple lines

Step by Step

Putting a line on hold

On a multi-line telephone you can use the line keys to place calls on hold.

**Prerequisite**: You are conducting a call.

Press the call-line sensor key.

- The LED line key flashes.
- The LED line displays the hold status on all multi-line phones to which the line is connected.
- On phones connected to the line, a user can press the relevant line key and accept the held call.

During a consultation call or after accepting a waiting call the hold function cannot be used.
Making calls with multiple lines

Step by Step

Lines with hot or warm line function

Your service personnel can configure a hot or warm line for the primary and secondary line.

The function is activated when on
• the primary line
  you lift the handset on the phone and press the line or loudspeaker key
• the secondary line
  you press the line key.

A number specified by you is dialed with a hot line immediately and with a warm line after a specific time.

Examples:
• The phone in the lift immediately dials the reception number.
• The phone at a patient’s bed dials the ward number e.g. after a minute if no other number is dialed.

Entering a number for the hot and warm line function

Specify which number should be dialed when the hot or warm line function is activated.

You can also configure this setting via the web interface ⇒ page 233.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the required line in the context menu.

Select and confirm the option shown.
Making calls with multiple lines

**Step by Step**

Enter and confirm the destination.

Select and confirm the option shown.

**Busy override**

A station of a line trunk group is on a call. It’s primary line is configured as a secondary line on your phone. This line now has the status “busy.” You can join in the call by pressing the illuminated key of this line (see also page 25).

**Prerequisite:** A secondary line is configured on your multiline phone and busy override is enabled for you.

The key of secondary line illuminate – it is busy. You want to join in the call.

Press the lit key. A conference is established. You are connected to the parties on the secondary line. The key continues to illuminate and the conference is shown on the display.

If there is already a conference on the secondary line you are connected to this conference. The conference is shown on the display.

You can now:

- Put the secondary line on hold
- Leave the conference on the secondary line
- Make consultation call
- Accept a second call
- Alternate between a new call party and a conference on the secondary line.
- Include a call party from a consultation or a second call in the conference.
Step by Step

Direct station selection keys
Apart from line keys, administrator can also configure direct station selection (DSS) keys. You can use a DSS key to call an internal station directly, pick up calls for this station or forward calls directly to it.

Calling a station directly
You cannot use DSS if the user is on another call (flashing LED).

Calling from the idle menu
Press the relevant DSS key.

or

Press the key shown until the application’s Overview tab is active.

Select and confirm the DSS line. The key lights up and the connection is established via the primary line.

Consultation with the DSS station
Prerequisite: You are conducting a call and administrator have configured the DSS key for consultation.

Press the relevant DSS key for the consultation. The key lights up and a connection is established. If the called party answers, you can toggle, transfer the first call or initiate a conference.

If administrator have configured transfer instead of consultation, you can only transfer the current call to the DSS station.
Making calls with multiple lines

Step by Step

Call pickup
You can pick up calls for another DSS station. The LED flashes if a call incoming for this station’s line.

Indirect pickup
Prerequisite: The auto-answer function must be deactivated ➔ page 103.

Press the DSS key. The call is routed to your primary line and rings.

or  or   
Lift the handset or press the speakerphone mode or headset key. You are connected with the other party.

Rejecting a call
Prerequisite: Your administrator enabled the Reject option for DSS keys and deactivated Auto-answer ➔ page 103.

Press the DSS key. The call is routed to your primary line and rings.

Select and confirm the option shown in the pop-up menu.
The caller hears a busy signal.

Direct pickup
Prerequisite: The auto-answer function must be activated ➔ page 103.

Press the DSS key. The call is routed to your primary line and you are immediately connected with the other party via speakerphone.
Making calls with multiple lines

Step by Step

Deflecting a call to a DSS station

**Prerequisite:** The deflect function is enabled for DSS keys. For information on the current setting, see page 90.

If you receive a call on one of your lines, you can immediately deflect it to the DSS station.

Your phone rings and a line key flashes.

Press the relevant DSS key. The call is deflected to the DSS station. If the DSS station does not answer, you can pick up the call by pressing the DSS key.

LED display on DSS keys

Making calls with multiple lines

Making calls in an executive-secretary team

An executive-secretary team is configured by the relevant service personnel and may include up to four executive and up to two secretary telephones.

Sample scenarios

This example assumes that two executive and two secretary phones are configured. Calls for the executives are forwarded immediately to the respective secretary phone. A secretary then connects the call with or without consultation to the responsible executive using the direct station selection key.

Prerequisites:

The following call forwards are configured (page 72):

- For all calls from Executive 1 to Secretary 1
- For all calls from Executive 2 to Secretary 2
- Forward on Busy and forward on No reply from Secretary 1 to Secretary 2
- Forward on Busy and forward on No reply from Secretary 2 to Secretary 1

"Allow call waiting" should be activated on the secretaries' phones (page 98). This function can optionally be activated and deactivated using a key if a key has been configured for it.

Line and direct station selection keys have been configured by service personnel and "Transfer on hangup" and server features have been activated.
Accepting a call

Incoming calls for the executives should be forwarded immediately to the assigned secretary and answered there. The line overview (page 129) shows whether the executive has activated call forwarding.

Accepting calls at the secretary phone

An incoming call for “Executive 1” rings at the assigned “Sekretary 1”.

The line key of the “Sekretary 1” phone flashes.

Press the line key to answer the call. The station answers. The line key flashes rapidly.

Early call pickup by Executive 1

An incoming call for “Executive 1” rings on “Sekretary 1”. The “Sekretary 1” direct station selection key on the “Executive 1” phone flashes. The “Sekretary 1” has not yet answered the call. Before the call is forwarded to “Sekretary 2”, “Executive 1” picks up the call early.

Press the “Sekretary 1” direct station selection key on the “Executive 1” key to answer the call.

If for example a call for “Executive 2” on “Sekretary 2” is not answered, “Sekretary 1” or “Executive 1” can pick up the call early.
Step by Step

Forward to Sekretary 2

An incoming call for "Executive 1" rings at the assigned "Sekretary 1". The call is not answered. After a specified period the call is forwarded to "Sekretary 2". The line key of the "Sekretary 2" flashes and it rings.

Press the line key on the "Sekretary 2" phone to answer the call. The station answers. The "Sekretary 2" direct station selection key on the "Executive 1" phone illuminates.

If "Sekretary 1" is busy, the call is forwarded immediately to "Sekretary 2" if:
- a consultation call is being made or
- "Allow call waiting" is deactivated.

Second call

Prerequisite: "Allow call waiting" is activated.

If "Sekretary 1" receives a second call, this can be accepted, ignored, forwarded or rejected. Detailed information on this can be found from page 96.

If the second call was answered, it can be forwarded using consultation or the direct station selection keys.

Connecting a call

If e. g. the "Sekretary 1" answered a call, it can forward the call using the direct station selection keys to the following telephones:
- Executive 1
- Executive 2
- Sekretary 2.

The following examples show connections to "Executive 1".
Making calls with multiple lines

**Step by Step**

**Connecting with consultation**

Press the DSS “Executive 1” key. “Executive 1” answers. Announce the call.

Press the hang-up, loudspeaker or headset key.

You can also select “Complete Xfer” from the context menu.

**Connecting without consultation**

Press the DSS “Executive 1” key. “Executive 1” does not answer.

Select and confirm the option shown in the pop-up menu.

Press the hang-up, loudspeaker or headset key. The “Executive 1” phone rings.

If “Executive 1” does not answer the call, a Wiederanruf (see also page 100) occurs after a set time.

The “Executive 1” direct station selection key on the “Sekretary 1” phone illuminates.

**Consultation without connecting**

Press the DSS “Executive 1” key. “Executive 1” answers. Transferring is not wanted. The “Sekretary 1” takes the call back.

Select and confirm the option shown in the pop-up menu. The “Sekretary 1” is reconnected with the caller.

**Toggle, disconnect or conference**

During a consultation call “Sekretary 1” can toggle between “Executive 1” and the caller, can initiate a conference or disconnect one of the two call parties. More on this subject can be found on pages page 69 and page 109.
Making calls with multiple lines

**Step by Step**

**DSS keys**

These keys are configured in such a way that every phone can be reached by every phone in the group. The DSS keys are also used for consultation calls.

Press a team member’s DSS key. The relevant phone rings and the party answers.

**Using line overview**

To view the status of the lines, change from the “My phone” tab to the “Overview” tab on the phone screen.

Further information on the line status can be found on page 38.

The “executive-secretary” team can be expanded with line keys by the service personnel. These lines keys however have no influence on the behavior of the “executive-secretary” configuration.
"Executive-secretary" with Executive/Assistant Cockpit

An "Executive/secretary" team is configured by the service personnel using the "Executive/Assistant Cockpit" – referred to in this manual as E/A Cockpit. A team can for example consist of four executive and two secretary phones.

Sample scenarios

This example assumes that two executive and two secretary as well as two representatives (with variable numbers), two mobile phones (with fixed numbers) and an answering machine are configured for E/A Cockpit.
Making calls with multiple lines

Step by Step

Prerequisites:
The E/A Cockpit application is installed on the phone and the connection to a E/A Cockpit server entered.

“Allow call waiting” should be activated on the secretaries’ phones ( ⇒ page 98). Line and DSS keys have been set up and configured by service personnel and Transfer on hangup, uaCSTA and server features are activated.

Function overview
The following tasks can be performed using the E/A Cockpit application:

- Call forwarding management on the executive phones
  - Calls are forwarded to the secretary phone
  - Call forwarding is deactivated.
  - Calls are forwarded to a mobile phone
  - Calls are forwarded to a variable number
- Call forwarding for an executive phone can be configured directly on the executive phone or from the secretary phone.
- Call forwarding can be attached to a condition
- Secretary status management
  - Presence status
  - Call forwarding destination configuration
  - Representative activation and deactivation
- The presence status and required call forwarding for the secretary can be set from both the secretary and associated executive phone.
- The presence status and required call forwarding for the secretary can be set from both the secretary and associated executive phone.
- DSS keys can be used
- Connecting calls with and without consultation
- Calling configured executive mobile numbers and connecting calls.
- Answering and connecting calls
- Second call
Making calls with multiple lines

Step by Step

Launching the E/A Cockpit from the secretary

For completeness sake it is assumed that no other telephone in the team has launched the application at this point.

Press the key as often as required until the Applications tab is active.

Select the E/A Cockpit application.

Confirm the option shown. The XML application is launched and a new "E/A Cockpit" tab with the overview is opened. The last status and configured call forwarding are displayed.

Start

The displayed settings are examples.
Managing call forwarding

Every executive can configure their displayed call forwarding themselves or can have the secretary configure them. The result is displayed in the E/A Cockpit tab of Sekretary 1 and Sekretary 2.

In the overview menu E/A Cockpit of Sekretary 1, call forwarding for Executive 1 should for example be modified.

Select and confirm the option shown. You are offered the Settings selection menu for Executive 1, with the following options (examples):

- Immediate Ring
- To Assistant (Strict)
- To Mobile
- To 31201
- To Voicemail

Cancel call forwarding

This option has no further settings. The selection is confirmed and then call forwarding is canceled. If a call is received for Executive 1, his phone rings. Select and confirm to cancel call forwarding.

Forward to assistant

The “To assistant” option offers further setting options. If you want to apply the current setting, you only confirm this option. For additional options:

Open the context menu

Select and confirm the option shown. You see the “Preferences” selection menu with the following options:

- Soft (if At Desk, otherwise Immediate Ring). The view in the E/A Cockpit overview menu is then: “To Assistant (Soft)"
- Regular (if At Desk, otherwise To Voicemail). The view in the E/A Cockpit overview menu is then: “To Assistant (Regular)"
- Regular mobile (if At Desk, otherwise To executive Mobile). The view in the E/A Cockpit overview menu is then: “To Assistant (Regular mobile)”
Making calls with multiple lines

Step by Step

- Regular to number (if At Desk, otherwise to a number). The view in the E/A Cockpit overview menu is then: “To Assistant (Regular to number)”
- Strict (To Assistant in any case - Desk, Box or Mobile). The view in the E/A Cockpit overview menu is then: “To Assistant (Strict)”

If each other the other respective secretaries has the “At Desk” status (page 135), calls are forwarded here.

Forwarding calls to a mobile phone

Calls can for example be forwarded to the mobile phone from Executive 1.

Select and confirm the option shown. Calls are forwarded to a predefined mobile phone number.

Forwarding calls to a variable number

Calls can be forwarded to any number.

Select and confirm the option shown. You can change the number firstly via the context menu.

Executive 1 and Executive 2 manage the call forwarding themselves using the My status option. The change is displayed on the secretary phones.
Managing secretary statuses

The "My status" option on the secretary phone is used to set the presence status and if required to configure call forwarding.

Configuring status and call forwarding

Confirm the option shown. The "Set Status" dialog opens.

The following options are available in the "Set Status" menu:
- At Desk
- Off Desk
- To 31201
- Deputy [123456] on

Select the required option and confirm this. If a representative is activated, "Deputy [123456] off" appears in the options list.

If Sekretary 1 only has the "Off Desk" status, all his calls are automatically forwarded to Sekretary 2.

If you activate one of the two call forwardings, the "At Desk" or "Off Desk" do not affect these.

If the "To Assistant (Strict)" setting on the executive is activated, the variable call forwarding and the call forwarding to the representative only takes effect if the other secretary has the "Off Desk" status or has activated call forwarding to a representative or variable number.

The "To" variable call forwarding and call forwarding to a representative can be configured simultaneously:
- Deputy: Forwards calls for the executive phones
- Variable call forwarding: Forwards calls for the secretary phone

If the respective other secretary has the "At Desk" status, calls are forwarded.

The current status of call forwardings is displayed in the "My phone" tab on the respective executive phone.
Making calls with multiple lines

Step by Step

Changing the call forwarding destination
Open the context menu. You have the following options:
- Call mobile
- Forward Nr.
- Deputy Nr.
- Deputy on or Deputy off
The "Forward Nr." and "Deputy Nr." options are used to modify the number for variable call forwarding and for the representative.

Changing the status remotely from another phone
For example you can change the status of the first secretary phone from the executive phone or the second secretary phone.
Confirm the option shown. You have the following options if defined.
- At Desk
- Off Desk
- Deputy [123456] on
- To Mobile
- To Voicemail
Confirm e.g. to configure the absence of Sekrety 1.
The secretary settings are displayed on all phones.
Making calls with multiple lines

Step by Step

Making calls in the E/A Cockpit team

Using DSS keys

These keys are configured in such a way that every phone can be reached by every phone in the group. The only exception is when both secretaries have the “Off Desk” status and variable call forwarding is configured, then calls are forwarded to the destinations of the variable call forwarding. The DSS keys are also used for consultation calls.

Calling the executive’s mobile phone or connecting to the mobile phone

If an executive is away, the secretary can reach him directly on his mobile phone. If necessary change to the E/A Cockpit tab.

Open the context menu.

Select and confirm the option shown.

E.g. Executive 1 select and confirm the option shown

The mobile phone rings and Executive 1 answers.

If you have a call on hold, you can connect the other station with Executive 1 by simply hanging up.

Answering and connecting calls

The procedure for answering and connecting calls in the team is exactly the same as described in chapter Making calls in an executive-secretary team (→ page 125).

Second call

Prerequisite:

- ”Allow call waiting” is activated.
- The respective other secretary has the “Off Desk” status or
- The other secretary is already on a call and active call forwarding is set to your phone.

If you receive a second call, you can accept, ignore, forward or reject it. Detailed information on this can be found from → page 96.

If you have answered a second call, you can connect the call via consultation or using the DSS keys.
Step by Step

Settings for multi-line phones (keyset)

The details for each keyset line contain supplementary information for the user. The following uneditable fields are displayed:
- **Address**
  - Displays the phone number for the line
- **Ring on/off**
  - Shows whether the ringer is activated for this line
- **Selection sequence**
  - Displays the priority of each line seizure when the handset is lifted or the loudspeaker key for this line is pressed

Displaying the line in the "Overview" tab

Specify here if the selected line should be displayed in the "Overview" tab.

You can also configure this setting via the Web interface ➞ page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Setting the time for a delayed ringer

Specify the length of time before a held call should be signaled on a line.

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the required line (e.g. primary line).

Select and confirm the option shown.

Enter and confirm a value (between 0 and 3600 seconds).

Select and confirm the option shown.

You can activate and deactivate the set delay time for all line keys using a function key → page 87.
Making calls with multiple lines

Step by Step

Configuring the "Overview" tab display

Specify here the sequence in which the individual lines in the "Overview" tab should appear on the display.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

All lines that are displayed in the overview (➔ page 138) are listed.

Select and confirm the required line (e.g. primary line).

Select one of the following options from the context menu to move an individual line:

- Move up
- Move down
- Move to top
- Move to bottom

Select and confirm the option shown to arrange the lines in the same sequence as the line keys

Select and confirm the option shown to display all line keys in the overview.

The setting made for "Allow in overview" (➔ page 138) is ignored here.

Select and confirm the option shown.
Step by Step

Line preview

**Activating via the line keys**

**Prerequisite:** You are already on a call on one line and a further call rings on the secondary line. Service personnel have activated line preview.

Press the flashing trunk key. A popup window opens and you receive information about the caller.

Press the flashing line key to answer the second call.

If service personnel have deactivated the line preview, a call is answered immediately on a secondary line when the line key is pressed, without showing caller information.

**Activating via preview key**

**Prerequisite:** You have programmed a sensor key with the “Preview” page 82. Your service personnel have activated the preview function.

**Preview for a call:**

You are already conducting a call on one line. A further call rings on a secondary line.

Press the “Preview” sensor key. A popup window opens and you receive information about the caller.

Press the “Preview” sensor key again to hide the preview or wait until the popup closes itself after a specified period of time.

**Permanent preview**

Press the “Preview” key in idle mode. This way the preview for all lines with “preview mode” remains active until you press the “Preview” sensor key again.
Making calls with multiple lines

### Step by Step

**Rollover for a line**

Your administrator can determine how rollover calls are to be signaled.

- Only the relevant line key blinks.

- You hear a **special advisory tone** and the corresponding line key flashes.

- The **ringer melody set sounds briefly** (approx. 3 seconds) via the loudspeaker and the corresponding line key blinks.

- You hear a short **notification tone**

- The ringer melody is not played in speakerphone mode.

The telephone rings using the configured call signal, the corresponding line key blinks, and a pop-up menu containing the available information is displayed.
Phonebooks and call lists

Personal phonebook
Your personal phonebook should not contain more than 1000 entries.

Creating a new contact
Press the key shown.
Select and confirm the option shown.
Select and confirm the option shown in the context menu.
The form for entering contact data opens.
You do not have to complete all fields to save a new contact.
Select and confirm the field you want.
Complete and confirm.

Editing a contact
Press the key shown.
Select the party.
Select and confirm the option shown in the context menu.
The form for entering contact data opens.
Select and confirm the field you want.
Complete and confirm.
Select and confirm the option shown.
Step by Step

Selecting a preferred phone number
If multiple phone numbers were assigned to a contact, you can select the preferred phone number here that you want to use for calls via the phonebook.

Press the key shown.
Select a phonebook entry.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Select and confirm the preferred phone number. The phone number is stored.

Deleting all phonebook entries

Press the key shown.
Select and confirm the option shown.

Select and confirm the option shown in the context menu.
A confirmation request opens.
In the pop-up menu:
Select and confirm the option shown. All entries are deleted.
## Managing contact groups

### Creating a new group

Press the key shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

An overview appears for new groups.

Enter and confirm a new group name.

Select and confirm the option shown. The new group is stored.

### Editing a group name

Press the key shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm a group.

Select and confirm the option shown in the context menu.

Select and confirm the field you want.

Edit and confirm an entry.

Select and confirm the option shown. The changes are applied.
Phonebooks and call lists

Step by Step

Adding a contact to a group

Press the key shown.
Select a phonebook entry.
Select and confirm the option shown in the context menu.
Select and confirm the option shown.
Select and confirm a group.
Select and confirm the option shown.

Deleting a group

Press the key shown.
Select and confirm the option shown.
Select and confirm the option shown in the context menu.
Select and confirm a group.
Select and confirm the option shown in the context menu.
A confirmation request opens.
Select and confirm the option shown.

Saving a picture for a contact

Press the key shown.
Select and confirm the option shown.
Select and confirm the option shown in the context menu.
Select and confirm a group.
Step by Step

Select and confirm the option shown in the context menu.

Select group member.

Select and confirm the option shown in the context menu.

The form for entering contact data opens.

Select and confirm the option shown.

Select and confirm the picture. Pictures must be available; you can load them using OpenStage Manager, for example.

Select and confirm the option shown. The selected picture is assigned to the contact. It appears on the graphic display with the usual contact information the next time a call is received.

Quick search in the phonebook

You can use the quick search to search the phonebook for the initial letters of a specific last name.

Press the key shown.

Enter the initial letters. The quick search input mask opens automatically. Your search is narrowed down by every additional letter entered in the input mask.

Select a contact as soon as the name you are looking for appears.

Select and confirm the option shown in the context menu.

Select and confirm the preferred phone number. The phone number is dialed.
Phonebooks and call lists

Step by Step

Changing the display format for contacts

Press the key shown.
Select and confirm the option shown.

Select and confirm the option shown in the context menu.
Select and confirm the display format.

Press the key to return to the phonebook. The display format selected is stored.
Phonebooks and call lists

**Step by Step**

**LDAP database**

You can search an LDAP database (corporate phone-book) for contact entries if you can reach this database over your network and your access was correctly configured by your administrator.

You can perform searches using the name (simple search) or different information on an entry (advanced search), for example, job title or department name.

**Finding an LDAP entry**

Press the key until the "Corporate" ("LDAP") tab is active.

Select and confirm the option shown in the **Options** context menu.

Select and confirm the required search field (for example, "Last name").

Enter a search text.

Once you have completed all required search fields, confirm the search request by selecting and confirming "OK" on the display keypad (⇒ page 30).

> When entering data in the search fields, note that
> 1. the entry of wildcards is not permitted.
> 2. an * is automatically inserted at the start of the search string for phone numbers.
> 3. an * is inserted at the end of the search string in other fields.

You can perform searches using the name (simple search) or different information on an entry (advanced search), for example, job title or department name.

You can now:
- call the LDAP contact (⇒ page 105).
- view the LDAP entry (see below).
Step by Step

Viewing an LDAP entry

Prerequisite: You found and selected an LDAP entry (see above).

Select and confirm the option shown in the context menu for the entry.

New search

To conduct a new search, you must first clear all the search fields.

Select and confirm the option shown in the Delete context menu. All search fields have been cleared.

Defining a qualifier before a search

Prior to a search, you can select which qualifiers should also appear in the output list in the Options context menu.

Select and confirm the option shown. You may choose between the following criteria:

- No qualifier
- Job function
- Address 1
- Email
- Business 1
- Mobile
- Business 2
- Private
- Company
- Address 2

Select and confirm the desired qualifier.

Exit the list.
Step by Step

Quick search

Press the key as often as required until the "Corporate" (LDAP) tab is active.

Enter the initial letter of the surname you need, e. g. "K".

A single-line search window appears at the lower edge of the display.

Do not enter any further characters. After a predefined period of time or after pressing the button all available names with the corresponding initial letter are displayed. You can restrict the output by entering the second and other letters. The key is used to switch between letters and numbers. The key is used to delete individual characters.

When entering extended characters you can control the search individually. For the selection of extended characters firstly press the button.

Rule list:

<table>
<thead>
<tr>
<th>Extended character</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>#</td>
<td>Searches for the exact string before the extended character.</td>
</tr>
<tr>
<td></td>
<td>You can enter first and last name separately using a comma. A search is</td>
</tr>
<tr>
<td></td>
<td>carried out for the last name (possibly using a wildcard) and the first</td>
</tr>
<tr>
<td></td>
<td>first name with the first character after the comma.</td>
</tr>
<tr>
<td>*</td>
<td>Wildcard. This searches for the character entered and all possible</td>
</tr>
<tr>
<td></td>
<td>subsequent characters.</td>
</tr>
</tbody>
</table>
You can copy contacts from the company-wide phone into your personal phonebook.

Press the key as often as required until the "Corporate" (LDAP) tab is active.

Select the required entry from the list, e.g. Hans Meier.

Select and confirm the option shown in the context menu. The entry is copied with all details into the personal phonebook. The "Contact created" message appears.
Phonebooks and call lists

Step by Step

Call lists
For a detailed description of the different call lists, see page 43.

Viewing details
Prerequisite: You selected an entry.
Select and confirm the option shown in the context menu.
For display and information shown page 44.

Deleting entries
Deleting an individual entry
Press the key until the call list you want is active.
Select the entry you want.
Select and confirm the option shown in the context menu.
The entry is deleted.

Deleting all entries in a list
Press the key until the call list you want is active.
Select and confirm the option shown.
Select and confirm the option shown in the context menu.
All entries in the list displayed are deleted.
Phonebooks and call lists

Step by Step

Copying entries from the call lists into the personal phonebook

Press the key until the call list you want is active.

Select the entry you want. \[\text{page 40}\]

Select and confirm the option shown in the context menu.

You have the following options for “Create contact”:
- Saving and changing
- Saving without changing
- Exiting (without saving)

Saving and changing

Select and confirm the option shown.

The mask to edit a contact in the personal phonebook opens \[\text{page 143}\]. Fill out the relevant fields accordingly and save the new contact.

Saving without changing

Select and confirm the option shown.

An entry is created and the message “Contact created” is displayed. If you open the phonebook, you will be prompted to update the directory. For this type of entries a group “Copied contacts” is created so that you can find them more easily.
Deactivating the ring tone

You can deactivate your ring tone if you do not want to be disturbed by your phone ringing.

**Deactivating the ring tone using the keypad**

Hold down the key until the “Ringer off” icon appears on the status bar on the display ( page 29).

The ring tone is deactivated.

To switch the function back on, hold down the key until the “Ringer off” icon disappears from the status bar on the display.

You can also switch the function on and off using the option in the idle menu.

Select and confirm the option shown.

**Deactivating the ring tone via sensor key**

**Prerequisite:** The “Ringer off” sensor key must be configured ( page 82).

Press the “Ringer off” sensor key.

Press the lit sensor key once more to deactivate the “Ringer off” function.
Step by Step

Do not disturb

If "Do not disturb" is activated, your telephone will not ring. The caller hears the busy signal.

Prerequisite: A programmable sensor key must be assigned the function "DND" (Do Not Disturb) ( \( \rightarrow \) page 82). "Do not disturb" must be allowed \( \rightarrow \) page 157.

Enabling "Do not disturb" via a key

Press the "Do not disturb" programmable sensor key.

To deactivate the "Do not disturb" function, press the lit programmable sensor key again.

Enabling "Do not disturb" via the idle menu

Select and confirm the option shown in the idle menu. The "Do not disturb" icon appears in the header.

Select and confirm the option shown in the idle menu. The "Do not disturb" icon disappears.

On multi-line telephones ( \( \rightarrow \) page 14) you can only activate the "Do not disturb" function for your primary line.
Privacy/security

Step by Step

Allowing "Do not disturb"

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.
Privacy/security

Step by Step

Security

User password

Your user password protects your individual configurations, including your language settings. You can also use the user password to lock your telephone ➔ page 160.

The preset password "000000" corresponds to a blank password. In other words, the phone cannot be locked and the user menu is not password protected (see also ➔ page 159).

The user password can also be modified via the Web interface (➔ page 233).

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Press the key to delete the existing password.

Enter a new password (at least six characters, text entry, see ➔ page 30).

Select and confirm the option shown.

Enter and confirm the new password once more.

Select and confirm the option shown.
Deactivating the user password

You can deactivate the phone’s password prompt if a password has already been configured.

The deactivation of the password prompt does not affect the Web interface page 233, OpenStage Manager or CTI applications that use a password prompt. The password “000000” must be entered here.

If you deactivate the user password, you are not able to lock the phone page 160 and the user menu is not password-protected.

Press the key shown until the “Settings” tab is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Press the key to delete the existing password.
Enter six zeros (“000000”) to deactivate the password.
Select and confirm the option shown.

Enter six zeros (“000000”) once again and confirm.
Select and confirm the option shown.
### Step by Step

#### Locking the phone

You can lock your phone to protect it against unauthorized access. In this way, no one can make calls or change your user settings unless they know your user password.

Predefined numbers from the dial plan can still be dialed when the phone is locked. For more information, contact your administrator.

If an emergency number is entered by administrator, "Emergency call" appears on the display when you use the line on a locked phone.

---

You can only lock the phone if you set a user password (→ page 158). The password for this should not match the default "000000".

#### Activating the phone lock

Hold down the key shown until "Phone lock Confirm lock" appears.

In the pop-up menu:

- Select and confirm the option shown. The phone lock activates immediately.

- Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown in the context menu. The phone is locked.

Select and confirm the option shown. The phone is locked.
Step by Step

Unlocking the phone

Confirm the option shown.

or

If the display is empty,

Hold down the key shown until "Enter Password" appears.

Enter and confirm the User password. The phone is unlocked if the password is correct.

Emergency numbers and predefined numbers from the dial plan can be dialed from a locked phone.

If the telephone is locked repdial keys cannot be used. This also applies when emergency numbers or predefined numbers from the dial repdial are stored on them.
Step by Step

Mobility function

**Prerequisite:** Your phone is configured to support mobility by administrator. A DLS server is available in the LAN and its address is entered in the phone.

Mobility scenarios

When you log on to your phone, or any other mobility-enabled phone, the following scenarios are possible:

**Logging on and off at the same phone**

- Log on as a mobility user ➔ page 163.
- Log off as a mobility user ➔ page 164.

**Logging on and off at different phones**

In these cases, administrator may have made the following settings:

- Log on at a remote phone with forced logon, when the user is still logged on at that phone ➔ page 165.
- Delayed logon at a remote phone with forced logon, when the user is still logged on at that phone and the phone is busy ➔ page 166.
Step by Step

Logging on and off at the same phone

Logging on to the phone

No other mobility user is logged on.

**Logon via a key**

If a program key is configured for Mobility.

Press the “Mobility” program key.

**Logon via the context menu**

Select and confirm the option shown in the idle display context menu ➔ page 33.

You are prompted to enter your mobility ID.

Enter and confirm mobility ID – usually a phone number.

You are prompted to enter the password.

Enter and confirm the user password.

The following messages appear on the display:

- Logging on mobile user
- Validating
- Registering
- Downloading user data

Once logon is complete, the “Mobility” program key LED lights up and the mobility icon 📱 appears in the graphic display next to the mobile phone number.
Logging off from the phone

**Prerequisite:** You are logged on as a mobility user.

**Logoff via key**

If a program key is configured for Mobility.

Press the "Mobility" program key.

**or Logon via the context menu**

Select and confirm the option shown in the idle display context menu ⇒ page 33.

Is displayed. You briefly have the option to cancel the logoff, otherwise the logoff process is launched.

In the graphic display, the following messages appear:
- Logging off mobile user
- Uploading user profile
- Registering
- Downloading user data

After you have logged off, the mobility icon ⌂ is hidden.
Step by Step

Logging on at different telephones

An attempted login is rejected if the user is already logged on to another phone and "Logon with forced logoff" is disabled for the mobility user.

Logging on with forced logoff at a remote phone

If the user is already logged on at another phone and the remote phone is busy, the logon is rejected.

If, however, your service personnel enabled "Forced logoff during call" without setting a time, the system does not consider whether or not the remote phone is busy.

Logon via a key

If a program key is configured for Mobility.

Press the “Mobility” program key.

or Logon via the context menu

Select and confirm the option shown in the idle display context menu ➔ page 33.

You are prompted to enter your mobility ID.

Enter and confirm mobility ID – usually a phone number.

You are prompted to enter the password.

Enter and confirm the user password.

The following mobility messages appear in the display:
- Validating
- Logging off elsewhere
- Registering
- Downloading user data

The logoff is simultaneously displayed on the remote phone. Once logon is complete, the “Mobility” program key LED lights up and the mobility icon appears in the graphic display 📞.
Logging on with forced, delayed logoff at a remote phone

If the remote phone is busy and your service personnel enabled “Forced logoff during call” with a set timeout, forced logoff does not occur until this timeout expires.

Logon via a key

If a program key is configured for Mobility.

Press the "Mobility" program key.

Logon via the context menu

Select and confirm the option shown in the idle display context menu ➔ page 33.

You are prompted to enter your mobility ID.

Enter and confirm mobility ID – usually a phone number.

You are prompted to enter the password.

Enter and confirm the user password.

The following mobility messages appear in the display:
- Validating
- Logging off elsewhere

At the same time, the graphic display on the busy remote phone shows "Forced logoff pending". After the set timeout the active call is ended and remote logoff is performed.

- Registering
- Downloading user data

Once logon is complete, the "Mobility" program key LED lights up and the mobility icon appears in the graphic display .
OpenScape Voice functions

The OpenScape Voice supports a number of functions that you can activate and deactivate from your phone.

The OpenScape Voice functions are only available if the "Server features" function was activated on the phone by the administrator.

On multi-line telephones, the full scope of OpenScape Voice functions is only available for the primary line.

Feature toggle key

You can pick a programmable sensor key and program it as a feature toggle key for activating the "make line busy" and "stop hunt" functions.

You can then use the programmable sensor key to activate or deactivate the relevant OpenScape Voice function on the server for this phone.

You can only program first-level programmable sensor keys because those linked to LEDs are used to display function status as either on (LED on) or off (LED off). The LED indicates the status of the function on the server and can therefore change without any of the programmable sensor keys being pressed.

Example:

Switching between "Line busy" and "Line free" (see also page 174).

Prerequisite: Your service personnel configured a programmable sensor key with the function "Busy" ("make line busy" for the hunt group) page 85.

Press the programmable sensor key – the key lights up.

Press the illuminated programmable sensor key once again to release the line - the keys stops illuminating.
Making anonymous calls

Your administrator decides whether or not your caller ID (name and phone number) is displayed on a called party’s station. Anonymous calling is when your data is not transmitted. The settings configured can be deactivated, however, for specific calls.

- If your caller ID is transmitted: your caller ID is displayed.
- If your caller ID is suppressed: “unknown” is displayed.

Deactivating

If your administrator permanently activated anonymous calling for your phone, you can deactivate this setting as follows:

1. Lift the handset.
2. Enter the code (see the table of codes page 182) to transmit the caller information.
3. You hear a confirmation tone.

Activating

If your administrator activated caller ID transmission for your phone, you can deactivate this setting as follows:

1. Lift the handset.
2. Enter the code (see the table of codes page 182) to suppress the caller ID.
3. You hear a confirmation tone.

Caller ID transfer is suppressed. “unknown/Anonymous” appears on the called party’s display instead of the caller ID.
Temporarily activate anonymous calling for the next call

If your administrator activated caller ID transmission for your phone, you can deactivate this setting for the next call as follows:

1. Lift the handset.
2. Enter the code (see the table of codes → page 182).
3. Wait until you hear the confirmation tone.
4. Dial the phone number of the party you want to contact.
   Caller ID transmission is reactivated after this call.

Temporarily deactivate anonymous calling for the next call

If your administrator suppressed caller ID transmission for your phone, you can enable this setting for the next call as follows:

1. Lift the handset.
2. Enter the code (see the table of codes → page 182).
3. Wait until you hear the confirmation tone.
4. Dial the phone number of the party you want to contact.
   When you end this call, caller ID transmission is suppressed once again for the next call.
Creating a list for selective calls

For call acceptance

You can create a list of the phone numbers from which you are willing to accept calls (also known as a selection list). Your service personnel know how long this list may be in the OpenScape Voice used on site in your facility.

A connection is set up if a caller’s phone number matches a number in the selection list. If there is a match:

- the caller receives a message that the party refuses to accept any calls with this number,
- the call is forwarded to an external phone number.

Contact your administrator for information on how your OpenScape Voice is configured on site.

Lift the handset.

Enter the code (see the table of codes → page 182).

Various announcements deliver the following information:

- the name of the feature (selective call acceptance)
- the current status (active or inactive)
- the current scope of the selection list.

These announcements are followed by verbal user prompts that let you:

- add entries to the selection list
- delete entries in the selection list
- check the selection list
- activate or deactivate the function.
Step by Step

For call rejection

As for selective call acceptance, you can create a selection list with the phone numbers of parties from whom you are not willing to accept calls. Your administrator know how long this list may be in the OpenScape Voice used on site in your facility.

A call is not connected if the caller’s phone number matches a number in the selection list; the caller is notified that the called party rejects calls from this number. If the caller’s number is not in the selection list, the call is to you as usual.

Lift the handset.

Enter the code (see the table of codes page 182).

Various announcements deliver the following information:
- the name of the feature (selective call rejection)
- the current status (active or inactive)
- the current scope of the selection list.

These announcements are followed by verbal user prompts that let you:
- add entries to the selection list
- delete entries in the selection list
- check the selection list
- activate or deactivate the function.
Anonymous calls

Rejecting
You can reject all calls from parties that activated a data protection feature (for example, caller ID suppression) to prevent their phone number from being transmitted. In this case, you are not informed that a call was rejected.

Lift the handset.
Enter the code (see the table of codes → page 182).

Accepting
You can also accept calls from parties that activated a data protection feature (for example, caller ID suppression) to prevent their phone number from being transmitted.

Lift the handset.
Enter the code (see the table of codes → page 182).
Using abbreviated dialing

Abbreviated dialing gives you access to a central list of frequently dialed phone numbers. You can dial a specific phone number by simply entering a digit string. As these are three-digit numbers, you can store up to 1000 phone numbers. This list is stored centrally and managed by your administrator.

Lift the handset.

Enter the code (see the table of codes ➔ page 182) followed by a number between 0 and 999 for the phone number you want to dial.

The number is automatically dialed.

Call tracing

You can request automatic tracing of the last received internal call. This is particularly suitable for identifying malicious, irritating or troublesome calls.

Lift the handset.

Enter the code (see the table of codes ➔ page 182). The call number is being determined. Ask your administrator for the result.
Hunt group functions

To ensure optimum handling of specific calls, your telephone can be assigned to a pickup group → page 59 and/or a hunt group.

Your administrator can incorporate multiple telephones in a hunt group. If your telephone is assigned to a hunt group, OpenScape Voice forwards calls for the members of your group in accordance with specific rules defined by your administrator. Hunt groups are a simple solution for distributing calls to a group of telephones.

If you want another member of the group to pick up an incoming call, you can set your telephone to signal the busy status for your line to the other members of the hunt group. Hunt group calls will then no longer be forwarded to your telephone.

This feature is configured using the feature toggle key (→ page 167).

Making a line busy

This prevents this line being used for calls in a hunt group.

Activating

Lift the handset.

Enter the code (see the table of codes → page 182).

Wait until you hear the confirmation tone.

Deactivating

Make the line free once more for the hunt group.

Lift the handset.

Enter the code (see the table of codes → page 182).

Wait until you hear the confirmation tone.
Marking the last line in the hunt group chain

Sets the "stop hunt" line in the hunt group chain. The system will stop looking for a free line in the hunt group chain after it reaches this line.

**Activating**

1. Lift the handset.
2. Enter the code (see the table of codes → page 182).
3. Wait until you hear the confirmation tone.

**Deactivating**

1. Unmark the line as the end of the hunt group chain.
2. Lift the handset.
3. Enter the code (see the table of codes → page 182).
4. Wait until you hear the confirmation tone.
Reachability

You can make either serial calls or simultaneous calls on several sites. The features for this are
- serial call
- parallel call

Prerequisite: The service personnel has configured the respective feature for your main number in OpenScape Voice.

Serial call

Managing number lists/activating serial call

Before the serial call number can be activated, a serial call list must be created. This can be prepared either by service personnel or you can create it yourself later. Up to six numbers can be entered in the list for sites on which incoming calls including your main number should be signaled sequentially. Each number can consist of up to 30 digits.

Lift the handset.

Enter the code for the edit mode (see code table ➔ page 182).

The edit mode opens and you hear an announcement with the following information:
- Feature name
- Current status (active/inactive)
- Number of numbers currently on the serial call list

You are prompted to do one of the following:
- Activate/deactivate the feature (only if numbers are already entered in the list)
- Call up the numbers currently entered in the list.
- Add or delete numbers
- Repeat the options in edit mode

If the serial call list is still empty, you are prompted to enter numbers in the list. As soon as you have entered a valid number, the serial call can be activated.

If the serial call is activated, incoming calls are first routed to your phone. If you do not answer within the timeframe defined by the service personnel, the next destination phone rings for the configured period of time.
Step by Step

The caller is informed that the call is being routed to another station. The connection is established with the first phone that accepts the call.

If the call is not answered by any phone, it is forwarded to the configured forwarding destination (on no reply) or to a “rejection announcement”.

Parallel call

Managing number lists/activating parallel call

Before the parallel call feature can be activated, a parallel call list must be created. This can be prepared either by service personnel or you can create it yourself later. Up to six numbers can be entered in the list for sites on which incoming calls including your main number should be signaled sequentially. Each number can consist of up to 30 digits.

Lift the handset.

Enter the code for the edit mode (see code table → page 182).

The edit mode opens and you hear an announcement with the following information:

- Feature name
- Current status (active/inactive)
- Number of numbers currently on the parallel call list

You are prompted to do one of the following:

- Activate/deactivate the feature (only if numbers are already entered in the list)
- Call up the numbers currently entered in the list.
- Add or delete numbers
- Repeat the options in edit mode

If the parallel call list is still empty, you are prompted to enter numbers in the list. As soon as you have entered a valid number, the parallel call can be activated.

If the parallel call is activated, incoming calls are routed to your phone and all other destination phones in the parallel call list. The connection is established with the first phone that accepts the call.

If the call is not answered by any phone, it is forwarded to the configured forwarding destination (on no reply) or to a “rejection announcement”.

OpenScape Voice functions
Activating/deactivating parallel call via code

You can activate/deactivate the parallel call without having to change to edit mode.

**Prerequisite:** You have already entered numbers in the parallel call list.

Lift the handset.

Enter the code to activate or deactivate the parallel call (see code table → page 182).
Parking a call

If you have answered a call for a colleague and cannot forward it to him, you can park the call.

**Park a call**

- You are conducting the call. Let the other party know, e.g. that you are trying to connect him.
- Enter the code for parking followed by a line number (see code table ⇒ page 182).
  - You receive a confirmation tone. The caller hears a waiting melody.
- Replace the handset
  - Tell your colleague that a call for him is parked and give him the line number.

**Unparking**

To unpark the call, your colleague must proceed as follows:

- Lift the handset.
- Enter the unparking code (see code table ⇒ page 182).
  - He is prompted to enter a line number.
- Enter the specified line number.
- Your colleague is now connected with the waiting caller.
Silent Monitoring

If this function has been configured by service personnel and enabled for the destination phone, you can join an active call of an internal station and listen in unnoticed (muted) or with the knowledge of the target station (active).

Active silent monitoring

Station A and B are on a call. You want to listen to the call but so that Station B does not notice but so that you can still talk to Station A.

- You can hear and talk to station A.
- You can hear station B but cannot talk to him because he cannot hear you.
- Station A and B can hear and speak to each other.

Lift the handset.

Enter the code for active silent monitoring and the destination number (see code table page 182). You are connected to the call and can listen. If necessary notify station A.

End the silent monitoring unnoticed by replacing the handset.
Muted silent monitoring

Station A and B are on a call. You want to monitor a call but so that neither station notices.

- You can hear station A but cannot talk to him because he cannot hear you.
- You can hear station B but cannot talk to him because he cannot hear you.
- Station A and B can hear and speak to each other.

Lift the handset.

Enter the code for active silent monitoring and the destination number (see code table page 182). You are connected to the call and can listen.

End the silent monitoring unnoticed by replacing the handset.
Table of codes for OpenScape Voice functions

Ask your administrator to enter the latest codes in the following table. Print this page as an overview.

Individual phone configuration

Display

Adjusting the display to a comfortable reading angle

You can swivel the display unit. Adjust the display unit so that you can clearly read the screen.

Appearance

Select your preferred appearance for the menu display here.

For sample display themes, see page 29.

You can also configure this setting via the Web interface page 233.

Press the key shown until the "Settings" tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Select and confirm the required color in the context menu.¹

Select and confirm the option shown.

¹ The phone displays the current setting.
Step by Step

Lamp brightness for TouchSlider

Adjust the brightness of the TouchSlider \(\rightarrow\) page 20 by choosing one of the six settings available.

You can also configure this setting via the Web interface \(\rightarrow\) page 233.

Press the key shown until the “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Confirm the option shown.

Set the contrast (freely adjustable).

Set the contrast in stages.

Confirm the option shown.

Select and confirm the option shown.

Save & exit
Step by Step

Set the sensitivity of the TouchGuide

Adjust the sensitivity of the TouchGuide → page 22 by choosing one of the four settings available.

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Confirm the option shown.

By sliding

Pressing, you can choose one of four levels for the sensitivity.

Confirm the option shown.

Select and confirm the option shown.
Step by Step

Contrast for the OpenStage Key Module

If you have connected an OpenStage Key Module, you can adjust the key label contrast to suit your ambient lighting.

You can also configure this setting via the Web interface page 233.

Press the key shown until the “Settings” tab is active.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Confirm the option shown.

Set the contrast (freely adjustable).

Set the contrast in stages.

Confirm the option shown.

Select and confirm the option shown.
Individual phone configuration

Step by Step

Screensaver

Activate a screensaver for the telephone idle state.

Your administrator can set a time of between two and eight hours defining how long the phone should be idle before display backlighting deactivates completely.

You can also configure this setting via the Web interface page 233.

Activating the screensaver

Prerequisite: Your administrator have loaded pictures to the OpenStage.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Step by Step

Date and time
You can choose the date and time display here.
You can also configure this setting via the Web interface page 233.

Setting the time
Press the key shown until the “Settings” tab is active.
Confirm the option shown.
Enter and confirm the user password.
Confirm the option shown.
Select and confirm the option shown.
Enter and confirm the time.
Select and confirm the option shown.

Setting the date
Press the key shown until the “Settings” tab is active.
Confirm the option shown.
Enter and confirm the user password.
Confirm the option shown.
Select and confirm the option shown.
Enter and confirm the date.
Select and confirm the option shown.
Step by Step

**Time display format**

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the display format (12- or 24-hour display) in the context menu.

Select and confirm the option shown.

**Date display format**

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the display format shown.

Select and confirm the format you want.

Select and confirm the option shown.
Step by Step

Setting daylight saving time

You can also configure this setting via the Web interface ➔ page 233.

**Prerequisite**: Auto DST is deactivated ➔ page 193.

Press the key shown until the "Settings" tab is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.

**Setting the difference between daylight saving and standard time**

**Prerequisite**: Auto DST is deactivated ➔ page 193.

Enter the difference to be used for daylight saving time.

Press the key shown until the "Settings" tab is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Enter and confirm the difference between daylight and standard time in minutes.
Select and confirm the option shown.
Step by Step

**Automatic daylight saving time**

The **Auto DST** setting is provided for information purposes and can only be changed by your administrator.

- You can also access this information via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

You can manually set the daylight saving time if a **No** entered here → page 192.
**Step by Step**

**Audio**

Optimize the audio settings on your OpenStage for your environment and according to your personal requirements.

**Volumes**

Set the volume here, for instance, for the loudspeaker, handset or headset.

> Use the TouchSlider to adjust the current volume settings → page 20.

You can preset different volumes for the following microphones and signals in eight levels:
- Loudspeaker
- Ringer
- Handset
- Headset
- Handsfree
- Rollover

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the volume you want to adjust (for example, “Handset”).

Confirm the option shown.

Set the volume (freely adjustable).

Set the volume in stages.

While setting the volume, you will hear corresponding audio feedback.
Individual phone configuration

Step by Step

Confirm the option shown.

Select and confirm the option shown.

Settings

Room character

To ensure that the other party can hear you properly in speakerphone mode, you can adjust the phone to the room acoustics by choosing one of the following room character conditions:

- Normal
- Echoing
- Muffled

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Select and confirm the room character¹ in the context menu (e.g. normal).

Select and confirm the option shown.

The following values are available in the list:

- 1.0 sec. On, 4.0 sec. Off
- 1.0 sec. On, 2.0 sec. Off
- 0.7 sec. On, 0.7 sec. Off

Select and confirm the option shown.

¹ The phone displays the current setting.
Individual phone configuration

**Step by Step**

**Ringtone**

Select your preferred ringtone from the available audio files. If no individual audio files are available the "pattern" ringtone is preset. To upload your own files in ".mp3" or ".wav" format, please contact your service personnel.

You can also configure this setting via the Web interface ➔ page 233.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select the option shown.

Select and confirm the required ringtone file\(^1\) or "pattern." You will immediately hear the associated ringer melody. Confirm the selected ringtone file.

Confirm the selected ringtone to use it or try a different ringtone.

¹ The phone displays the current setting.
Individual phone configuration

Step by Step

Context menu

After a connection is set up, a context menu appears with dependent functions. You can activate/deactivate the automatic display and can also set how long the context menu should be displayed.

You can also configure this setting via the Web interface → page 233.

Press the key shown until the "Settings" tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Activating/deactivating automatic menu display

Select and confirm the option shown.

In the context menu select and confirm to activate automatic menu display.

Select and confirm the option shown.

Setting the display time

Select and confirm the option shown.

In the context menu select and confirm a value from the following options:

- 5
- 10
- 20
- 30
- 60
- 120
- Unlimited display

Select and confirm the option shown.
Individual phone configuration

Step by Step

Bluetooth

Activating and deactivating Bluetooth

You can also configure this setting via the Web interface → page 233.

Press the key shown until the “Settings” tab is active. Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth settings dialog is selected.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth function is activated and is now available.
**Open Bluetooth discoverability**

You can use this function to set whether or not your OpenStage should be transparent to other Bluetooth devices when operating in Bluetooth mode.

- You can also configure this setting via the Web interface ➔ page 233.
- Press the key shown until the “Settings” tab is active.
- Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth settings dialog is selected.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth function is not transparent to other devices that are not yet connected to your OpenStage.

For security reasons, it is recommended that you **only activate** the “Discoverable” function for Bluetooth when new Bluetooth devices are to be connected. A connection is established for devices that are already connected even if the “Discoverable” function is deactivated.
Individual phone configuration

Step by Step

Bluetooth name for your OpenStage

Here you can determine which name your OpenStage should use to register at other Bluetooth devices.

You can also configure this setting via the Web interface → page 233.

By factory default, the Bluetooth name is:

OpenStage [MAC address of your telephone].

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth settings dialog is selected.

Select and confirm the option shown.

Specify and confirm the required name.

Select and confirm the option shown.
Step by Step

Configuring pairing settings

Pairing is used for checking the access authorization of a Bluetooth device in a Bluetooth network. During the pairing process, a 128-bit connection key is created. This is used for subsequent identification. You can specify whether pairing should be Automatic, occur after a Prompt or not at all.

You can also configure this setting via the Web interface page 233.

Pairing is only performed the first time contact is established between a Bluetooth device and your OpenStage. If the Bluetooth device is successfully paired, no further access authorization checks are necessary. Instead, each subsequent check uses the previously created connection key.

Press the key shown until the application’s “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth settings dialog is selected.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown.

Save & exit
Individual phone configuration

Step by Step

Entering the pairing PIN

The personal identification number (PIN) contains at least four alphanumeric characters. This PIN is used for securely pairing Bluetooth devices with your OpenStage.

You can also configure this setting via the Web interface page 233.

Press the key shown until the application’s “Settings” tab is active.

Select and confirm the option shown. Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth settings dialog is selected.

Select and confirm the option shown. Enter and confirm the PIN.

Select and confirm the option shown. The pairing function is now activated.
Managing Bluetooth devices

The following functions are available in the Bluetooth pairing manager:
- Add a Bluetooth device
- Delete Bluetooth device list
- Connect or disconnect paired Bluetooth devices
- Remove single Bluetooth devices from the list
- Rename Bluetooth devices in the list

You can also configure this setting via the Web interface → page 233.

Adding a Bluetooth device

Press the key shown until the application’s “Settings” tab is active.
Select and confirm the option shown.
Enter and confirm the user password.
Select and confirm the option shown.
Select and confirm the option shown.
Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.
Select.
Select and confirm the option shown in the context menu. The system searches for devices.
If at least one new device is detected, select and confirm the relevant Bluetooth device.
Enter and confirm the specified PIN → page 209. The message “Pairing in progress” is displayed.
If the pairing request is confirmed on the corresponding Bluetooth device and the password entered, the pairing is performed and the device is added to the list.
Your OpenStage is now “paired” with the Bluetooth device, but not yet connected → page 212.
Deleting all Bluetooth devices from the list

You can delete the whole list if, for example, the devices are no longer in the area.

Press the key shown until the application's "Settings" tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select.

Select and confirm the option shown in the context menu.

“Delete all devices from pairing list?”

Confirm, if you wish to delete all devices.
### Connecting/disconnecting a Bluetooth device

**Prerequisite:** At least one Bluetooth device is listed.

Press the key shown until the application's "Settings" tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select the relevant Bluetooth device.

Select and confirm the option shown in the context menu. The connection is established immediately, if the relevant Bluetooth device is reachable.

Select and confirm the option shown in the context menu.
Deleting a Bluetooth device from the list

You can delete a single Bluetooth device from the list if, for example, it will be away from the area for an indefinite period.

Press the key shown until the application’s “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select the relevant Bluetooth device.

Select and confirm the option shown in the context menu.

Confirm, if you wish to delete the device.
Individual phone configuration

**Step by Step**

**Renaming a Bluetooth device in the list**

A Bluetooth device is entered in the list with the name set in the device. This is often the device type. You can change this logon name.

Press the key shown until the application's "Settings" tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select the relevant Bluetooth device.

Select and confirm the option shown in the context menu.

Enter and confirm the new name.
Individual phone configuration

**Step by Step**

**Blacklist for Bluetooth devices**

The blacklist contains Bluetooth devices to which your OpenStage should not connect.

**Adding a Bluetooth device**

Press the key shown until the application’s “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth blacklist editor dialog is selected.

Select.

Select and confirm the option shown in the context menu. The system searches for devices. The detectable Bluetooth devices in your area are listed. Select a device, for which you wish to block connection.

Select and confirm the relevant device to add it to the list.
Step by Step

Removing a Bluetooth device from the blacklist

Press the key shown until the application's "Settings" tab is active.
Select and confirm the option shown.
Enter and confirm the user password.
Select and confirm the option shown.
Select and confirm the option shown.
Select and confirm the option shown. The Bluetooth blacklist editor dialog is selected.
Select the relevant Bluetooth device.
Select and confirm the option shown in the context menu.
Confirm, if you wish to remove this device from the list.
Individual phone configuration

**Step by Step**

**Network information**

This information overview in the user area of the service menu provides you with information about the IP address or name of the phone and the HTML address of the web-interface. It also provides real-time data about the network activity of the phone.

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown. The following overview opens:

<table>
<thead>
<tr>
<th>Options</th>
<th>Exit</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP address</td>
<td>192.168.1.15</td>
</tr>
<tr>
<td>WBM URL</td>
<td><a href="http://192.168.1">http://192.168.1</a>...</td>
</tr>
<tr>
<td>DNS domain</td>
<td>Phone 1</td>
</tr>
<tr>
<td>LAN RX</td>
<td>100 Mbps full duplex</td>
</tr>
<tr>
<td>LAN TX</td>
<td>100 Mbps full duplex</td>

<td>Yes</td>
</tr>
<tr>
<td>LAN information</td>
<td>100 Mbps full duplex</td>
</tr>
<tr>
<td>PC autonegotiated</td>
<td>Yes</td>
</tr>
</tbody>
</table>

**IP Address:** Displays the IP address or name which was assigned to the phone in the network.

**WBM URL:** HTTPS address of the Web interface. This address is specified in the address line of the Internet browser and is used to call the Web interface of the phone in the browser.

**DNS domain:** The administrator can also assign the phone to the IP address of a DNS domain (for example, http://my-openStage.phone/).
Resetting user data

The following user-specific settings changed via the phone menu or the Web interface can be reset to factory settings.

- Display settings
- Language setting
- Screensaver
- Audio settings
  - Volumes
  - Settings
- Configuration
  - Context menu
- Bluetooth
  - Configuration and Listen
- Phonebook
  - All entries are deleted.
- Call lists
  - All entries are deleted.
- Sensor keys
  - All personalized programming is deleted (see also page 88).

Important: All data is reset without a warning tone. If necessary back up your data on a USB memory stick (→ page 228).
Initiating the reset

Press the key shown until the "Settings" tab is active.
Confirm the option shown.
Enter and confirm the user password.
Select and confirm the option shown.
Select and confirm "Reset selected user data" in the context menu. The user data is reset to factory settings.
Bluetooth

Bluetooth is an open standard for high-performance technology and allows wireless communication between PCs, PDAs, and mobile telephones.

In contrast to infrared connections, Bluetooth does not require a visual contact for communication purposes and can be used over distances of up to 10 meters.

To exchange data between Bluetooth-enabled devices, the devices need to undergo a once-off discovery procedure.

Discoverability

When first enabling a connection to a Bluetooth device, this function must be switched on page 206.

The OpenStage is discoverable for other Bluetooth devices by default.

To prevent unauthorized access, we recommend deactivating discoverability once you have enabled the connection to a new Bluetooth device.

Pairing

Pairing is the process used by two Bluetooth-enabled devices to "see" one another and to "recognize" that they can exchange data. It is therefore used for checking the access authorization of a Bluetooth device in a Bluetooth network. To do this, a 128 bit link key is created for subsequent identification.

Paired Once

A connection is established for devices that are already connected even if the "Discoverable" function is deactivated.

A connection is only performed the first time contact is established between a Bluetooth device and your OpenStage. If the Bluetooth device is successfully paired, no further access authorization checks are necessary. Instead, each subsequent check uses the previously created connection key.
Step by Step

Transferring contacts

The Bluetooth function on your OpenStage allows you to transfer contacts in vCard format (file extension: .vcf) from other Bluetooth devices to your OpenStage and save them in the phonebook. You can also send phonebook entries as vCards to other Bluetooth-enabled devices.

Due to the diverse range of PCs, mobile telephones and PDA devices currently available, we are unable to provide universal instructions on how to transfer vCard files in this manual. The instructions for data transfer via Bluetooth provided in the relevant manufacturer documentation should be observed.

Receiving a vCard

**Prerequisite:** The Bluetooth function on your OpenStage is activated → page 205. A vCard file is stored on your Bluetooth device (PC, PDA, mobile telephone, etc.).

Launch the data transfer wizard for Bluetooth and follow the instructions.

Once the vCard is transferred, a message confirming the successful transfer is displayed on your OpenStage. You may be prompted to accept the vCard.

Example:

![Message](image)

Select and confirm the option shown.

**Transferring a contact to the phonebook**

Press the key shown.

Select and confirm the option shown.
Bluetooth

Step by Step

Sending a vCard

**Prerequisite:** The Bluetooth connection is configured between your OpenStage and one other device ➔ page 205. A vCard file is saved on the OpenStage.

Search the phonebook for the entry you wish to send.

Press the key shown.

Select a phonebook entry.

Select and confirm the option shown in the context menu. The “Send vCard via Bluetooth” dialog is displayed.

**Sending to a paired device**

Select.

Select and confirm the option shown in the context menu for device. The vCard for the entry is sent.

Perform the necessary steps on the destination device to save the vCard data.

**or**

**Sending to an unpaired device**

Select.

Select and confirm the option shown in the context menu. A search is started and detected devices listed.

Select and confirm the relevant device in the list.

The vCard is sent.

Perform the necessary steps on the destination device to save the vCard data.

Detected devices are then deleted from the list.
Step by Step

Using a Bluetooth headset

You can connect a Bluetooth headset to your OpenStage 60/80 which is approved for use with the OpenStage 60/80. Ask for service personnel about approved headset types.

It is not recommended to activate the open listening feature in connection with a Bluetooth headset because this can lead to reduced quality depending on headset and environment.

Connecting the Bluetooth headset

**Prerequisite:** The Bluetooth function on your OpenStage is activated

Press the key shown until the application’s “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select the option shown.

Finding and connecting the Bluetooth headset

Now switch your Bluetooth headset to pairing mode (see the user manual supplied with the device).

Select and confirm the option shown in the context menu. The system searches for devices.

Select and confirm the Bluetooth headset found (Jabra BT500, for instance).

Enter and confirm the PIN (generally “0000” or “1234” for Bluetooth headsets – for more information refer to the headset description).
Step by Step

The message "Pairing in progress" is displayed. Following successful pairing, the device is added to the list of paired devices.

Connecting a Bluetooth headset to OpenStage

The Bluetooth headset must now be connected to the OpenStage 60/80.

Select the Bluetooth headset in the list.

Select and confirm the option shown in the context menu. The connection is immediately established and the headset is ready for operation.

Testing a Bluetooth headset

Press the key shown. You should now hear the on-hook signal in the headset.

Enter the station number.

or

In the pop-up menu:

Select and confirm the option shown. The connection is set up as soon as your input in complete.

If necessary, set the call volume.
Step by Step

Using a Bluetooth Conference Phone

You can connect a Bluetooth conference phone to your OpenStage 60/80 which is approved for use with the OpenStage 60/80. Ask your service personnel about approved conference phone types.

Connecting a "Konftel 60W" Bluetooth conference phone

Below is an example of connecting and operating a "Konftel 60W" conference phone.

Prerequisite: The Bluetooth function on your OpenStage is activated ⇒ page 205. The "Konftel 60W" conference phone is ready for use but turned off (see user guide "Konftel 60W").

Press the key shown until the application's “Settings” tab is active.

Select and confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the option shown. The Bluetooth pairing manager dialog is selected.

Select the option shown.

Finding and pairing the Bluetooth conference phone Konftel 60W

Hold down the trim key on the "Konftel 60W" for two seconds until the blue display lights flash (Warning: the device must be switched off first).

Select and confirm the option shown in the context menu. The system searches for devices.

Select and confirm the Bluetooth device Konftel 60W found.

Enter and confirm the PIN ("0000" for Konftel 60W).
Step by Step

The message "Pairing in progress" is displayed. Following successful pairing, the device is added to the list of paired devices. You hear a short confirmation tone from the Konftel 60W before the device switches itself off again.

Connecting Konftel 60W with OpenStage

The Konftel 60W must now be connected to the OpenStage 60/80.

1. Select the Konftel 60W on the list.
2. Select and confirm the option shown in the context menu.
3. Select the Konftel 60W on the list again.
4. Select and confirm the option shown in the context menu. The connection is immediately established and the Konftel 60W is ready for use.

Testing the "Konftel 60W" Bluetooth conference phone

Answering a call

Prerequisite: The "Konftel 60W" conference phone is ready for use but turned off (see user guide "Konftel 60W"). The OpenStage is in idle mode.

Both the phone and the "Konftel 60W" ring. The caller is displayed. To answer the call, you can now:

1. Press the key shown.
2. or
3. Select and confirm the option shown.
4. or
5. Press the On/Off key on the "Konftel 60W".

You are connected with the other party. The "Konftel 60W" is activated. You can now for example initiate a consultation call or accept a second call to set up a conference.
Step by Step

**Calling a station**

**Prerequisite:** The "Konftel 60W" conference phone is ready for use but turned off (see user guide "Konftel 60W"). The OpenStage is in idle mode.

- Press the key shown.

- or

- Enter the station number. The "Konftel 60W" switches itself on automatically. Once the stations answers, you can set up a conference via a consultation or second call.
Backup/restore

Backups are usually made to a USB mass storage device and contain user-specific data.

A backup includes the following components:
- All user settings for configuration
- Call forwarding instructions with default destinations
- Phonebook entries with relevant data
- Ringtones
- Photos
- Screensavers
- Call list entries

The USB mass storage device is only used to back up and restore the user area in the phone memory. You do not have to remove the USB medium after a backup. You can create multiple backups on the medium and restore them as required. You can also restore the backups saved on another phone as a means of transporting your settings and data, for instance, if your phone has to be replaced.

A restore operation only works if the relevant settings are enabled on the phone and the current software release supports these settings.

Every backup is given a separate name and is password-protected. Setting the password encrypts the content of the backup. Data can only be restored after entering the password set. The backup file is not automatically deleted after a restore operation.
Step by Step

**Saving user data**

Press the key shown until the “Settings” tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the backup available.

Select and confirm the option shown in the context menu.

Select and confirm the option shown.

Select and confirm the option shown.

Enter and confirm the backup password.

Select and confirm the option shown.

Re-enter and confirm the password.

Select and confirm the option shown. The user data is saved. The message **Backup created successfully** is displayed.
Restoring user data

Press the key shown until the “Settings” tab is active.
Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the backup you want.

Enter and confirm the backup password.

You can set Ignore or Restore in the context menu for the following options. The default setting is Ignore:
- Phone book
- Call logs
- Menu data
- Screensaver images
- All clip images
- All ringer tones
- All midlet data

If you want to activate the phonebook’s Restore, for instance, then:
Select the option shown.

Select and confirm the option shown in the context menu.

The restore operation can begin once you have activated all the options you want:
Select and confirm the option shown. The following message appears when the procedure is finished: Restore successfully completed.
Deleting a user backup on a storage medium

You can delete invalid or older backups on your USB medium.

Press the key shown until the "Settings" tab is active.

Confirm the option shown.

Enter and confirm the user password.

Select and confirm the option shown.

Select and confirm the option shown.

Select and confirm the backup you want.

Select and confirm the option shown. A security prompt is displayed:

Delete backup 17.08.08 14:42 August 3770?

Confirm the option shown to delete the backup. Backup deletion is the responsibility of the user and is therefore not password-protected.
## Step by Step

### Displaying and checking backups on USB media

Check which backups are stored on the medium.

1. Press the key shown until the “Settings” tab is active.
2. Confirm the option shown.
3. Enter and confirm the user password.
4. Select and confirm the option shown.
5. Select and confirm the option shown.
6. Select the backup you want and confirm it to check the settings.
Web interface (WBM)

You can configure a number of settings for your phone via the Web interface. Communication is via a secure HTTPS connection.

Calling up the Web interface

For more information on the IP address, the Web interface address, and how to connect the telephone to the network, refer to the section entitled “Network information” → page 217.

To call up the interface, open a Web browser and enter the following:

http://[IP address of the phone]:[port] or
https://[IP address of the phone]

[IP address of the phone] is the IP address of your phone.

https://[Name of the phone]

[Name of the phone] which was assigned by service personnel. [Port] is the port address of the phone’s HTTP server and must be 8085.

You might receive a certificate notification from the browser. Follow the instructions to download the certificate.

You will be prompted to configure a user password the first time you call up the Web interface → page 158. You must log on with this password in future every time you want to open the User Pages.

Administrator Pages

This area lets you configure settings for administering your phone and the network environment. Access to the Administrator Pages is protected by the admin password. For more information, contact your administrator or refer to the administration manual.
User pages

The Web interface homepage opens once you have entered and confirmed the phone’s IP address:

1. Click a menu heading to display the individual menu entries. Click the menu heading again to close the menu.
2. Click a menu entry to open the corresponding form.
3. Make the desired changes.
4. Click the corresponding button to save or discard your changes.

Button functions
- "Login": Log on to the phone after you have entered the user password
- "Submit": Apply changes
- "Reset": Reset original values
- "Refresh": Update values (for example, under "Bluetooth" - "Last connected device")
- "Logout": Log off the phone
User menu

All settings that you can make via the Web interface’s user menu can also be made via the phone’s user menu → page 47.

Fixing problems

Caring for your telephone

- Never allow the telephone to come into contact with coloring, oily or aggressive agents.
- Always use a damp or antistatic cloth to clean the telephone. Never use a dry cloth.
- If the telephone is very dirty, clean it with a diluted neutral cleaner containing surfactants, such as a dish detergent. Afterwards remove all traces of the cleaner with a damp cloth (using water only).
- Never use cleaning fluids containing alcohol or plastic-damaging detergents to clean the telephone. The use of scouring agents is also forbidden.

Troubleshooting

Pressed key does not respond:
If the telephone is locked repdial keys cannot be used. This also applies when emergency numbers or predefined numbers from the dial planed are stored on them.

Check whether your telephone is locked (“Phone locked: Enter Password” appears on the screen). If the phone is locked, unlock it.

The phone does not ring on call:
Check whether the ringtone is deactivated (see icon in the status bar on the display ➔ page 29). If it is deactivated, activate the ringtone

You cannot dial a number:
Check whether your telephone is locked (“Phone locked: Enter Password” appears on the screen). If the phone is locked, unlock it.

To correct any other problems:
First contact the relevant service personnel. Problems that cannot be corrected should be referred to Customer Service.

Contact partner in the case of problems

Contact your administrator if a fault persists for more than five minutes, for example.
Local user menu

Opening the user menu on the phone

Press the key to open the user menu.

On the Settings tab, select the User menu option. You are prompted to enter the User password \textit{Æ} page 158. Confirm this with OK. The options of the user menu are available.

User menu display

The majority of settings that can be made via the user menu on the phone, can also be made via the web interface \textit{Æ} page 233.

Changes are usually confirmed using the \textbf{Save & exit} option or discarded using the \textbf{Exit (no save)} option. You can exit the current menu level with the left key of the TouchGuide (\textit{Æ} page 22). You will be asked whether you want to \textbf{Save} or \textbf{Do not save}.

### Display icons

#### Application tab
- **Telephony interface** ⇒ page 37
- **Phonebooks** ⇒ page 40
- **Call lists** ⇒ page 43
- **Voicemail** ⇒ page 46
- **Program/Service menu/Applications menu** ⇒ page 47
- **Help function** ⇒ page 49

#### Status bar
- The ring tone is deactivated ⇒ page 155
- Operating data is sent to the server ⇒ page 50
- The "Do not disturb" function is activated ⇒ page 156
- The phone lock is activated ⇒ page 160
- The Bluetooth function is activated ⇒ page 220
- A mobile user is logged on to the telephone

#### Messages
- You have received one or more new messages
- One or more new entries have been added to the call lists
- Local call forwarding is activated for all calls

#### Connection status
- The call is active
- The call has been disconnected
- You have placed the call on hold (e.g. consultation hold).
- Your call partner has placed the call on hold
- The voice connection is secure.
- The voice connection is not secure.

#### MultiLine
- Call for the corresponding line.
- Call for a line with suppressed ring tone ⇒ page 142.
- "Hold reminder" is activated ⇒ page 93.
- The line is currently not available.
- The line is busy.
- The line is free.
