

***eduroam* is the University of Bamberg's WiFi**

You can also use *eduroam* for free internet access at other universities and research institutions worldwide.

Setting up *eduroam* in 4 easy steps

*For a complete and secure installation of eduroam, please use the **eduroam Configuration Assistant Tool** (*eduroam* CAT).*

1. Establish a network connection (via LAN, wireless internet or mobile data)
2. Download and install ***eduroam* CAT**

- (a) **Android**: download and install the *eduroam* CAT app from the Google Play Store
 - (b) **Other operating systems** (also for Android in case of problems): open **www.uni-bamberg.de/rz/eduroamCAT** and download and install *eduroam* CAT
3. Enter your user name and password
User name: BA number@uni-bamberg.de
Password: The password corresponding to your BA number (may need to be entered twice)
 4. Connect to *eduroam*: if your device does not automatically connect to eduroam, select the *eduroam* WiFi network and connect manually.
