

## **Writing your thesis at the Unit for Sociology with Focus on Education and Work in the Life Course**

If you want to write your thesis with us, please follow the following procedure:

### **1. Outline**

Please design a 1-2-pages outline, in which you briefly describe your research question and the planned structure of your thesis. This should cover your theoretical approach and the analytical strategy with which you want to investigate your research question.

The outline can also comprise several alternative topics for theses.

### **2. Send the outline to a potential supervisor**

Send your outline via e-mail to a potential supervisor. Please make sure that this person is a good fit to your suggested topics.

It is also advisable that you already know your potential supervisor from previous lectures or seminars that you have attended.

### **3. Feedback**

After you have submitted your outline, the potential supervisor will get in touch with you as soon as possible. If a supervision of the suggested thesis seems feasible, all further details will be clarified in an individual appointment during office hours.
