

University of Bamberg  
Chair of Methods of Empirical Social Research  
Prof. Dr. Michael Gebel  
<https://www.uni-bamberg.de/en/empsoz/>

European Research Council  
Established by the European Commission

The Chair of Methods of Empirical Social Research at the University of Bamberg  
invites applications for the following position:

**Research Associate in the ERC project SECCOPA  
(1 October 2021–31 March 2023; E13 TV-L; 65% working time)**

This is a European Research Council (ERC) Starting Grant project titled "The socio-economic consequences of temporary employment: A comparative panel data analysis" (SECCOPA) headed by Prof. Dr. Michael Gebel. The funding period is 1 April 2018 to 31 March 2023.

Temporary employment has become widespread in industrialized nations and many concerns have been raised about this development. Against this background, the SECCOPA project will provide new insights into the multi-faceted socio-economic consequences of temporary work, such as effects on the work career, risks of income poverty and material deprivation, and subjective well-being. Temporary work will be compared to the alternatives of permanent work and unemployment in a dynamic process and life course perspective. Comparative panel data from Europe (EU-SILC) and national individual and household level panel data from Australia, Canada, the United States, the United Kingdom, Germany, Switzerland, South Korea, and Japan will be investigated. Techniques of modern causal analysis based on panel data will be applied. Next to the moderating role of the household context the moderating role of the structural and institutional macro context will be investigated in a multilevel design. For further information about the SECCOPA project, visit <http://seccopa.de>

**The position and what is offered**

- + The duration of the contract is restricted to the remaining period of the project from 1 October 2021 to 31 March 2023 (=18 months) (Rules on fixed-term contracts of the German Wissenschaftszeitvertragsgesetz apply)
- + Optional: Later starting date is possible if notice period of previous job exceeds 1 October 2021
- + Remuneration is based on Grade E13 TV-L (65% working time) of the German Public Salary Scale (starting salary approximately 33,010 Euro per year before taxes, salary increases with work experience according to the regulations of the public salary scale)
- + Joining an innovative research project that is funded in the prestigious ERC grant scheme
- + Profiting from a vibrant internationally oriented research environment at the Chair of Methods
- + Opportunity to become an associate member of the Bamberg Graduates School of Social Sciences (BAGSS) and having access to workshops and further training in methods
- + Funding is available to attend international conferences, workshops, summer schools, and for research visits at institutions in the project countries
- + No teaching obligations

### **Your tasks**

- Descriptive research on the structural and institutional national contexts of the countries of interests
- Preparation of individual- and household-level national panel data and theory-driven causal analyses following the project tasks
- Preparing papers for publications in peer-reviewed journals
- Supporting the ERC grant holder in administrative tasks of the project
- Dissemination activities and social media outreach

### **Qualifications and requirements**

- ✓ Master degree in sociology, (survey) statistics, economics, psychology and political science or a related social science discipline (should be obtained before 1 October 2021)
- ✓ Strong methodological skills in advanced quantitative data analysis, particularly experiences in panel data analysis and very good knowledge of Directed Acyclic Graphs (DAGs)
- ✓ Strong interest and/or experiences in one or more of the following fields: life course, social inequality/stratification, labor market, well-being, poverty
- ✓ Strong interest in international comparative research using EU-SILC and national panel data from Australia, Canada, the United States, the United Kingdom, Germany, Switzerland, South Korea, and Japan (expertise on one or more of the countries is especially honored)
- ✓ Very good command of spoken and written English; German language skills are not required
- ✓ Ability to organize yourself efficiently and work collegially in an internationally oriented team

**The University of Bamberg aims to increase the share of women in research and teaching and, therefore, explicitly encourages applications from women. Where candidates are otherwise equally qualified, preference will be given to candidates with disabilities. The University of Bamberg has been certified by the Hertie Foundation as a family-friendly university and is committed to creating a balance between work and family life. As an international research institution, the University of Bamberg particularly welcomes applications from abroad.**

### **Your application**

Please send your application (a motivation letter, CV, copy of your master degree including a transcript of records and one work sample where you use quantitative methods (e.g. MA thesis, seminar paper, working paper, journal article or book chapter)) in one PDF document to [michael.gebel@uni-bamberg.de](mailto:michael.gebel@uni-bamberg.de). Use the subject heading "*SECCOPA Research Associate Position*".

**Deadline: 15 August 2021, CET.**

### **Information**

If you have any further enquiries about the positions, please do not hesitate to contact Prof. Dr. Michael Gebel at [michael.gebel@uni-bamberg.de](mailto:michael.gebel@uni-bamberg.de)
