

Modul MAEES3.4 Internationale Wirtschaft 4 <i>International Economics 4</i>		6 ECTS / 180 h
(seit WS19/20) Modulverantwortliche/r: Prof. Dr. Mishael Milakovic		
Lernziele/Kompetenzen: The objective of the course is to equip students with a critical understanding of contemporary macroeconomic theory, and to provide them with a methodological toolkit suitable for understanding the dynamics of complex systems. Lectures are in English.		
Sonstige Informationen: Diese Veranstaltung findet im WS 2019/20 nicht statt.		
Zulassungsvoraussetzung für die Belegung des Moduls: keine		
Empfohlene Vorkenntnisse: Mikro- und Makroökonomik I & II		Besondere Bestehensvoraussetzungen: keine
Angebotshäufigkeit: WS, jährlich	Empfohlenes Fachsemester: ab dem 3.	Minimale Dauer des Moduls: 1 Semester

Complexity and Distribution in Economics Lehrformen: Vorlesung, Übung Dozenten: Prof. Dr. Mishael Milakovic Sprache: Englisch Angebotshäufigkeit: WS, jährlich	4,00 SWS
Lernziele: The objective of the course is to equip students with a critical understanding of contemporary macroeconomic theory, and to provide them with a methodological toolkit suitable for understanding the dynamics of complex systems. Lectures are in English.	
Inhalte: This course deals with alternative approaches to the usual equilibrium concepts in economics. As it turns out, many economic and financial variables of interest exhibit robust distributional regularities across space and time, but have received at best minor attention in the literature. We will consider recent developments in statistical equilibrium theory, which is particularly suitable for studying problems that arise from the aggregation of many agents. Ideally, students will conduct their own data exploration exercises, drawing on examples from financial markets, industrial dynamics, and the distribution of wealth. To look for distributional regularities in macroeconomic variables within or across countries.	
Literatur: A syllabus will be distributed in class.
