Winter Term 2021/22

Seminar (BA):

## International Institutions and their Role in Global Governance

**ECTS:** 6

**Date:** Wednesday, 2 – 4 p.m. (c.t.), two sessions on Thu. 18/11/2021 and 10/02/2022 10-12 a.m.

**Room:** Zoom/F21/03.03

The globalized world is characterized by an increasing number of transnational challenges and problems like climate change, financial crises or security threats that cannot be solved by national states unilaterally. Therefore, states create international institutions that enable cooperation among them in the international system. Nowadays, almost all areas of international politics are regulated by international institutions and their number and scope continues to expand. However, international institutions are organized in very different ways and show mixed results in achieving their goals.

The aim of this undergraduate seminar is to develop a toolbox that allows students to analyse international institutions and their role in global governance systematically. The seminar is divided into two parts. First, we will focus on different theoretical approaches for the analysis of international institutions. Then, we will apply those approaches to central international institutions and to specific cases in which they are actively involved. Thus, the seminar enables students to deepen their theoretical knowledge of international institutions as well as their empirical knowledge of central issue areas like security, trade, finance, health and environmental politics.
